Filing Date Is Advanced to Aug. 15

U.S. Extends Tax Deadline for Americans Overseas

By Robert C. Since

WASHINGTON, May 25 (IHT) — A two-month extension of the U.S. " income tax-filing deadline has been granted to Americans overseas by the nternal Revenue Service. Returns must now be in hy Aug. 15.

The decision, announced yesterday, was made after the IRS concluded hat recent congressional action has improved the chances that the foreign ncome provisions of the 1976 Tax Reform Act would be deferred for ncome carned last year.

TERDI: Two weeks ago, the Senate passed by voice vote a measure that would TTEMprovide for such a deferral and then replace the reform act provisions for acome carned this year and thereafter with a series of special deductions.

Last week, members of the House Ways and Means Committee decided in x o urge their Senate colleagues to accept a one-year deferral of the 1976 ect and drop the reform provisions. In return, the House panel promised n work up its own permanent solution to the problem of taxation of Americans overseas by the end of the summer.

Two weeks ago, IRS officials said that no blanket extension of the filing leadline for Americans abroad could be granted until Congress took

ome action and there appeared to be a good chance that a deferral would

by the House panel had lead the IRS to change its stand.

The IRS decision may have come to late for many overseas Americans, no, because the tax agency does not accept foreign postmarks as proof of filing before the deadline, must mail returns days and even weeks early to make sure they arrive in the United States in time. If the deferral is finally passed, these taxpayers will have to file ameoded returns to get

supporters of changes in the 1976 act. Sources said that the Ways and

In addition, this course of action could avoid a fight with the Senate, where many members are strongly averse to granting a deferral of the tax reform provisions without accompanying reform. The existence of an ac-

Yesterday, sources said that the Senate action coupled with the promise

The extension of the deadline, also may change the strategy of some Means Committee may work up its own reform hill first before going to conference with the Schate. Some staffers feel that this would put the House conferees in a much stronger bargaining position than the mere

tual House bill on the matter could allay some of these fears.

Mobutu Not Officially Told

French Paratroops Begin Withdrawal From Shaba

Foreign Legion paratroopers who recaptured Kolwezi and freed bundreds of European bostages began their withdrawal today, the De-fense Ministry announced. But Zaire President Mobutu Sese Seko. here for talks yesterday with President Valery Giscard d'Estaing, said that he heard the report on radio but had not been officially in-

The 600 Foreign Legion pararoopers were dropped oo Kolwezi Friday and Saturday. Four of their men were killed in fightiog with the rebels who overran the Zaire mining center nearly two weeks ago.

A Defense Ministry spokesman said that the Freneb garrison in Kolwezi would be reinforced by

Moroccan troops.

President Mobutu told a news conference: "All I know officially up to this moment is that the Second Foreign Legion Paratroop Regiment would be split into two parts and one of them would move to Lumumbashi to reassure the expatriate population there."

No Direct Criticism

Mr. Mobutu avoided any direct criticism of Mr. Giscard d'Estaing, with whom he conferred yesterday shortly before the French leader's departure for the United States.

"Giscard d'Estaing is the Euro-pean chief of state who best understands the problems of Africa," Mr. Mobutu said. ". . . In the West's total abandonment [of Africa] to the Russians and Cuhans, only France has shown a willingness to take up the challenge, but France does not have the means to do it alone."

Mr. Mohutu stressed, however, that Mr. Giscard d'Estaing failed to notify him at their meeting yesterday of the imminent withdrawal of the paratroopers from Kolwezi.

"President Giscard d'Estaing is friend," Mr. Mobutu said. "And I can tell you on my honor that he spoke of the withdrawal of the legionnaires only when they had accomplished their mission. been fulfilled, Mr. Mobutu replied: "As far as Kolwezi is concerned, ves. But there is still the problem of some 60 white hostages taken away hy the invaders for whom the search continues.

He did not say whether he had requested the French troops to continue their operations in the Kolwezi area.

Security Zone

He said that he has ordered the creation of a 100-kilometer-long, free-fire zone along the Angolan and Zambian borders to prevent further infiltration of rebels. He did not specify the width of the security zooe but said that the civilians were being evacuated, and "our forces

that moves within that area." Mr. Mobutu repeated his earlier assertions that a motorized compaoy of Cuban infantry was with the invaders when they first overran Kolwezi. The invasion was coordioated in Angola by the Cuban gen-eral, Jose, Mr. Mobutu claimed.

A spokesman for the French De-fense Ministry said that the invading troops were probably trained by Cubans in Angola, but there was absolutely no evidence of their presence in Zaire.

Mr. Mobutu said that agents of U.S. special services conducted a survey of the bodies of Europeans murdered in Kolwezi and found cartridge cases of Soviet-made AK-47s in virtually every case. The Zaire Army does not use weapons of this type, be added.

matioo indicated that a group of exiled opponents of his government living io Brussels went to Havana to work out details of the invasion, which was originally planned for

Carter Says Cuba Aided Zaire Rebels

CHICAGO, May 25 (UPI) — President Carter today accused the Cubans of doing nothing to prevent the jovasioo of Zaire by Shaba rebels, lo a news conference at the start of a two-day political trip, Mr. Carter said that the Cubans played "a key role in training and equipping" the rebels, and

"We believe that Cuba had known of the Katangan plans to invade Zaire and obviously did nothing to restrain them from crossing the border." Mr. Carter expressed gratifulde that the U.S. role had virtually ended, and said that bloodshed — bad as it was — would have been far more severe had European and U.S. rescue efforts not taken

Mr. Carter said that he spoke for all Americans in expressing "abhorrence and distress over the Invasion. As great a human tragedy as it was, it could have been worse for Europeans and Zairians if we had not joined with our allies" in the rescue

"Our action to help rescue those who have been threatened in Zaire has virtually come to an end," Mr. Carier said. "Our transport aircraft . . . will be returning to their bases within the next few days." The president said that the rescue effort showed our willingness to consult fully with the Congress before taking any actions. I imposed strict limits on our actions and they were

U.K. Liberals Quit Labor; **Election Expected in Fall**

LONDON, May 25 (Reuters) -The Liberal Party announced today that it would end its pact supporting Britain's minority Lahor government at the end of the parliamentary session later this year. An election this autumn is now

almost certain because the government would find it difficult to control the House of Commons without Liberal support

end in July, or continue until Octo-her. The 13 Liberal members of Parliament are pledged to support

farming. The hope, officials say, is

that those projects would be the ca-

talysts for Africa's biggest post-in-dependence drive to moderniza-

tion. The plan would be open to

many African countries, not just

French-speaking ones, including

countries such as Guinea, which

follows o radical ideology without

Essentially a fund, the French five-year plan calls for contribu-

tions from five industrial countries:

The United States \$400 million,

France \$200 million. West Germa-

ny \$200 million, Britain \$150 mil-

lion and Belgium \$50 million. The

plan would triple U.S. aid to Africa

for five years. Overall aid to Africa

now is less than \$1 billioo annually.

in the Carter administration have

been initially cool to the plan. Dip-

lomatie sources said that it remains

unclear whether the plan would

until then. In announcing the end of their 15-month pact with Labor, the Lib-

the government on major voting

erals are trying to disassociate themselves from the government in time for the next election. The pact keeping Labor in power generally has not been popular with their Prime Minister James Callaghan

consider "arrangements for the next and final session of the present Parliament during the early autumn.

But elections in Britain are not called until three weeks before polling, and in holding to tradition, Mr. Callaghan would not hint at an autumn election now. He must hold one by October, 1979, when

his five-year mandate expires. Labor Leads io Poll

A public opinion poll earlier this week gave Labor a 4.9-percent lead over the Conservative opposition.

A by-election in a Labor-held

seat in Glasgow next week, and possibly two more during the next months, will give Mr. Callaghan further indicators of his chances in an autumn poll. David Steel, head of the Liberals,

said today that the pact, the first of its kind in British parliamentary history, had helped Britain's economie recovery and had reversed inflation.

The alliance has always been shaky. Earlier this month, Liberals combined with Conservatives to force an income-tax cut through Parliament.

Earlier this week, Mr. Steel said that he saw oo grounds for continuing the alliance unless the Lahor government held a referendum on

A proportional-representation system would give the Liberals maoy more seats in Parliament, but most Labor politicians oppose it.

U.S. Asks Curb On Immunity For Diplomats

WASHINGTON, May 25 (UPI) - Legislation sharply curtailing immunity of foreign diplomats from criminal and civil suits, including payment to U.S. victims of their traffic accidents, has been stroogly endorsed by the adminis-Justice and State Department of-

ficials told the Senate Foreign Relations Committee yesterday that U.S. laws should conform to a 1961 Vienna diplomatic immunity convention signed by the United States in 1972.

That eonvention grants absolute immunity only to top diplomats, gives partial immunity to others on a declining scale according to their official duties, and eliminates protection for servants. U.S. diplomats already are subject to the convention in most countries, they said.

Sen. Paul Sarbanes, D-Md., said

that under the current immunity law, "diplomats, their families and their servants can flaunt traffic laws, leave a trail of unpaid bills. break leases, fail to pay rent, damage or destroy property, or even commit serious personal torts and crimes with impunity."

News Analysis

Africa Protests Sink U.S.-Cuba Detente

By John M. Gosliko

WASHINGTON, May 25 (WP) — A few months ago the Carter administration, in a public listing of its achievements, pointed with particular pride to two foreign-policy "breakthroughs" — the Panama Canal Irealies and the move toward improved the mith Cuba

about an impendiog "new era" in U.S.-Cuban relations. When administration officials discuss President Fidel Castro's Cuba these days it is in iones ringing wilb frus-

Iration and anger.

Prompting the shift has been Washington's mounting concern about Cuba's role as the alleged military proxy of the Soviet Union in Africa. That coounent currently seems unable to have an armed cooflict without Cuhan soldiers and technicians - more than 30,000, according to administration estimates — lurking in the back-ground or openly taking part io the

The situation bas prompted a lot of talk - in Congress, in the press, and in some quarters of the admioistration - about the need to get tough with Mr. Castro. According this argument, the way to comhas Soviet influence in Africa is to apply pressures against Cuha that will force Mr. Castro to bring his soldiers home.

Leverage Lacking

However, such talk doesn't arouse much enthusiasm among U.S. officials familiar with Cuba. Within the administration they are privately trying to make a case that the United States simply doesn't have much leverage that can be

brought 10 bear against Cuba. Because of the high political sen-sitivity of the loternal administration debate on Cuba, these officials were reluctant to be identified. They are arguing though, that Mr. Castro has what be regards as very compelling pragmatic and ideologi-cal reasons for his involvement in

When these are weighed against Washiogtoo's biggest potential counterpressure — a hreaking off of the movement toward normal relations - there's no question of which choice the Cuban president will make.

The most obvious consideration keeping Mr. Castro involved in Africa has to do with his cootinued dependence on Sovies aid and financial support. Moscow put more than \$1.7 billion into Cuba during. improved lies with Cuba. 1977, and its contributions this Now, no one talks any longer year will exceed \$2 biltion.

Better Price

At a time when the world market price for Cuba's major commodity, sugar, is roughly 8 cents a pound, the Soviet Union buys the bulk of the Cuban sugar crop at 30 cents a

Similarly, while other small countries are strangling financially in the escalating cost of paying for petroleum imports, Moscow sup-plies all of Cuba's oil needs at prices far below the going free-market

In contrast, the only economic advantage that Cuba could gain from normal relations with Washington would be an increase in U.S.-Cuban trade. As the Cubans like to point out, the biggest advan-tage would go to the United States, which would be selling expensive technology and finished products while huying relatively cheap Cuban raw materials.

What once loomed as the biggest lure of increased trade - the chance for Cuba to get back a piece Castro a major figure on the world of the lucrative U.S. sugar market stage. It was personified by his — has lost a lot of its attraction for most famous collaborator, the late

Finally, there is the continuing

search for the rebels. Many have

fled across the border into Zam-

bia, but others reportedly simply

result, is will oo looger have to think exclusively in terms of the United States as the market for the

sugar that the Russians do oor buy.
The Cubans readily admit that
improved relations with the United States would give them some cash advantages, principally in the sale of Cuban metal exports and a potential rise in tourist traffic.

But, they also oote, these gains would still be only a small factor in the statistics of the Cuban economy, which is now tled inextricably to the Soviet Unioo and the Com-

Nor are cash considerations the only reason for Havana's involvement in Africa. Most experts on Cuba believe it is a serious mistake to assume that President Castro is simply using his soldiers and technicians as mercenaries for hire to

Although Cuba is probably the most ideologically inconsistent and undisciplined Marxist country anywhere, there is one belief from which the Castro government has never swerved over the years.

That is the mystical conviction that Cuba, which was transformed into a Communist state through guerrilla warfare, has an obligation to support "wars of liberation" throughout the Third World.

This emphasis oo exporting revolution has been perhaps the biggest factor in making President the Cubans.

Iran's Premier

TEHRAN, May 25 (AP) -- Iranian Premier Jamshid Amouzegar said yesterday that the government would act strongly to end the anti-government rioting of the last five Nearly 3,000 expatriate whites months.

In an interview, Amouzeran rebel invasion, most of them work- blamed a small group of extremists ing in the copper-inining complex backed by an international terrorist that is the backbone of the Zaire network for instigating the unrest that has killed 40 and caused wide-

spread destruction.

The demonstrations come as Shah Mohammed Reza Pahlavi is. allowing unprecedented criticism of representative of Zaire rebels said the government as part of a politi-here today that its forces had taken no civilian European hostages with modate the country's growing midthem while retreating from dle class. The premier emphasized Congo National Liberation Froot

tinue with liberalization. In line with a royal communique issued this week, Mr. Amouzegar said that security forces would quickly quell any demonstrations that lead to vandalism and looting.
"If these people want to have mild and silent demonstrations, fine. .If they want to go to the mosque and give speeches and criticize the government, that is perfectly all

He said that anyone caught destroying property would be tried by military courts; those who partici pate in demonstrations would be tried in civilian courts, where penalties are usually much lighter. Trial of political dissidents before civilian judges is one of the reforms instituted.

Peru Back to Normal After 2-Day Strike

LIMA, May 25 (AP) — Buses, trucks and army vehicles moved through Lima yesterday, signaling the end of a violent 48-hour general strike that shut Peru's major cities. For the first time in two days, consumers ventured to market as transportation, industry and shops returned to normal schedules. The official death toll was eight, but unofficial reports said that 23 persons were killed and many wounded. Hundreds of persons were arrested. The strike was held to protest the soaring cost of living.

telproof car in his capacity as the president of the ruling Christian Democratic Party and planner of the Communist-supported govern-

ment that was sworn io within hours of his abduction.

In his Senate address, Mr. Andreotti said that Mr. Moro seemed so unperturbed about any danger "that he continued his greatly expected way of life going for walks posed way of life, going for walks sometimes with his grandson and sticking to a methodical timetable and habits."

Newspaper reports that Mr. Moro's guard commander, Oreste Leonardi, had also applied for an armored car were officially denied several days ago.

France Plan For Africa

(Continued from Page 1) sional reluctance to approve aid funds without arrangements for case-by-case review.

West Germany Wary

No European government bas committed itself to the plan, and West Germany, even more than the United States, is suspicious of possible French intentions of using Western aid to boost French pres-tige in Africa — an attitude reflecting West German disenchantment over what it perceives as France's channeling of funds in the Sahel relief consortium to French proteges among the recipient governments.

France certainly has its own interests that would be served by the plan. If a fund is organized for a crash program, much of the man-agement inevitably would have come from France's pool of African specialists.

French aid to African states now about \$750 million annually --has been reduced from the levels maintained by previous govern-ments, and the plan would enable Mr. Giscard d'Estaing to appease African resentment over the loss. The French-African summit here this week endorsed the French president's plan for a "special fund for Africa" and urged him to seek U.S. cooperation at his meeting with President Carter.

Giscard's Approach

Mr. Giscard d'Estaing's ap-proach to President Carter therefore will emphasize the timeliness of using the aid program to chal-lenge Soviet influence, reinforce the attractions of a Western orientation and consolidate stability by boosting the African economies, which were hit hard hy the energy crisis.

The aid effort was broached with the United States in 1976, shortly after the Angola problem. It was received enthusiastically on May 7. 1976, at a meeting to discuss Africa between Mr. Giscard d'Estaing and then-U.S. Secretary of State Henry

Mr. Kissinger promised that U.S. backing for the aid plan would be coming, but only after trade-offs. which are still secret, according to sources familiar with the negotia-

While the Carter administration has shown only minimal interest in the plan, it has backed French military activity in Africa, and French officials feel that the United States and other Western countries have a moral debt to France for running risks in Africa while other governments were paralyzed by parlia-mentary opposition or a wider na-tional malaise. The French say that they are deliberately leaving the de-tails vague now: If the political consensus is achieved, the specifics can be worked out in consultations.

The French bope that the situa-tion in Africa will motivate other nations to back their idea. A favorable U.S. response is seen as the key to support from other European governments. It would also mark the first new public Franco-American cooperation in a long

Greece, Turkey In NATO Games

ABOARD THE NIMITZ, May 25 (AP) — The Nimitz, the biggest warship in the world, steamed off warsup in the world, steamed off the coast of Sardinia yesterday in NATO exercises involving about 100-ships, including sizable con-tingents from two allies at odds, Greece and Turkey.

Greece, which suspended its mil-itary participation in NATO after the Turkish invasion of Conversion

the Turkish invasion of Cyprus in 1974, contributed 19 ships to Exercise Dawn Patrol. Twenty ships from Turkey took part, despite Premier Bulent Ecevits warning in an interview this week that the continued U.S. arms embargo against Turkey would lead to a reduction in his country's partipation in NATO. Mr. Ecevit is due in Washington later this week to discuss his country's views with the Carter administration.

2 Americans Jailed 10 Years in Manila

MANILA, May 25 (UPI) — Two U.S. citizens, both members of the Indian-based Ananda Marga religious sect, today were sentenced to nearly 10 years in jail each for the attempted murder of an Indian Embassy official The two Americans, identified as

Dwyer and Victoria Sheppard, were in the Philippines on tourist visas when they stabbed J.S. Vaid, 46, in the oeck and body.

The Grizzly Situation

endar for consideration

Sen. Malcolm Wallop, R-Wyo., is upset about another type of pre-cedent that he fears would develop if the Senate adopts a bill that would pay \$98,999 to the estate of Harry Walker of Anniston, Ala. The amount would settle claims arising from his death in 1972 in Yellowstone National Park. Mr. Walker was killed and partially eaten by a grizzly bear that wandered

into his camp.
The Judiciary Committee, agree-

and appealing complaint and (3) to the House floor. Rep. Eilberg ing with Alabama's senators, who pushed the bill, passed it and sent it to the Senate floor. There, however, it stalled because Sen. Wallop objected to it. He says that the Treasury should not have to answer for wayward grizzlies.

Then there is the matter of the First Baptist Church of Paducah. The church's claim, for \$171,990, passed the House and the Senate and became law with President Carter's signature. What counted there, obviously, was a large amount of faith, plus a few handy political friendships. It involved an offer made in 1964

by the General Services Administration to buy the church building An option was signed, the church got bank loans and built a new house of worship elsewhere, count ing on the sale to GSA. But GSA bad a change of heart. That left the church with an abandoned building downtown that no one wanted and a costly new building in the outskirts of Paducah.

The Paducah Baptists thought that was not right. Last year, Sen. Wendell Ford, D-Ky., took up the cause and he got a compensation bill passed without a hearing in the Judicary Committee. Then the Senate passed the bill. That occurred one evening when only a few sena-tors were on the floor and the presiding officer happened to be. .Wendell Ford.

After months of thinking about it. a Judiciary subcommittee on claims held a hearing, passed the bill, and cut the amount of compensation from \$207,740 to \$171,990. The full committee approved the bill and the House passed it in early May. From the House, the bill went

back to the Senate, where it had to be reconsidered because of the amendment. Sen. Ford again happened to be presiding when the bill was called up late one afternoon. It passed again.

WestLB Interdomestic DM loans to international borrowers on national S.A., contributed substantially to the a long-term, fixed interest basis. WestLB's strong overall success. commitment to sound personal advice in the field

WestLB's leading position in domestic and international financing was again enhanced by the Bank's extensive refinancing capacity. The total flow of available funds increased by around DM 7.5 billion net to a total of DM 62.5 billion. Contributing to this were sales of own fixed interest securities, which rose to a record DM 6.6 billion gross and DM 3.7 billion net, as well as a

net increase in deposits from industry, institutional investors, state agencies and banks totaling DM 4.2 billion. This includes certificates of deposit with WestLB branches, which increased by 42.7 per cent to US \$ 665 million.

WestLB was manager for 45 syndicated loans to foreign borrowers as compared with 35 the previous year. The Bank was also in the management group of 24 other loans, The Bank's vital role as one of the foremost forces in the Eurobond market was again documented by the fact that WestLB was lead or co-managar in 48 public offerings out of a total of 78 DM issues.

benefiting more and more from WestLB's preeminent position as market maker in fixed interest securities in an exceptionally strong currency. Foreign exchange operations benefited from the Bank's client-oriented advice amidst increasing

currency uncertainties. International commercial banking activities such as letters of credit, payment transfers and export financing increased substantially, reflecting high quality and rapid client services and close contacts with correspondents. Local cost-financing facilities through the Bank's international network were also used extensively. Domestically the Bank enjoyed a particularly favourable uptum in long-term

financing to corporate clients. Long-term buyers' credits in conjunction with German export efforts also showed an above-average growth.

WestLB began 1978 by assuming complete ownership of the Hong Kong based merchant bank ASIAC. With its dynamic and flexible international capabilities, WestLB expects to further strengthen its position as one of the world's major wholesale financing institutes.

A strong force in wholesale banking VVestLB

(NYT) - Friends of a Georgian dissident sentenced last week to five years of imprisnnment and banishment said vesterday that most of his nationally televised "confession" had been fabricated hy the authorities.

Manana Ganisakhurdia, the wife of the 39-year-old dissident. Zviad. said that her husband insisted at the end of his trial here last Friday. "I do not renounce my humanitarian and patriotic activities. I will serve my sentence and return with

the same feelings."
But on television that evening, he said, "I sincerely regret what I have done." When an acquaintance visited him the next day and asked about his appearance, he replied. "I don't know when they could have filmed it." The friend said that the dissident had spent 4 of his 13 months of pretrial detention in a psychiatric hospital in Moscow. While he looked well on television. the friend said, at the trial he had looked emaciated and exhausted. A confession and statement of

4 More Journalists Arrested in Pakistan

KARACHI, Pakistan, May 25 (UPI) - Police arrested four more reporters yesterday, bringing to 131 the number of journalists jailed by

the military government.

The arrests occurred in Lahore. the focus of a month-long protest against the government's closing of a newspaper supporting deposed former Prime Minister Zulfikar Ali Bhutto. They were part of the government crackdown on journalists participating in a hunger strike be-cause of the newspaper's closure.

TBILISI, U.S.S.R., May 25 repentance published yesterday in the Tbilisi newspaper Zarya Vostoka quoted Mr. Gamsakhurdia as saying that he had been misled by other dissidents and by foreign correspondents. He was convicted on a charge of anti-Soviet agitation and propaganda, along with another Georgian, Merab Kostava.

Dissidents Shocked

The television confession came as a shock to dissidents in Moscow and to his friends here who knew him as a fiery advocate of Georgian independence from Soviet rule. He the son of the late Konstantin Gamsakhurdia, a Georgian national hero and poet.

Mrs. Gamsakhurdia, who has a 20-month-old son, does not wish to be quoted directly. But a close acquaintance who attended the fiveday irial said that her husband admitted having published, in an un-derground Georgian-language newspaper, anti-Soviet writings by Alexander Solzhenitsyn and Andrei Amalrik, both of whom now live ahroad: a proclamation be the emigre organization NTS, and a favor-able article about Shaldi Maglagelidze, a Georgian military man who with the Germans in World War II.

The article in Zarya Vostoka quoted Mr. Gamsakhurdia as having said in court; "I have come to the conclusion that I must review my position. Soviet power insures the best possibility of patrious activity. I would like to assure you that in all my future life and work I will try to redeem myself in the motherland's eye for my grave

There was no such statement." said the acquaintance who was at the trial. "He just never said those things at the trial."

LONDONDERRY, Northern Ireland, May 25 (AP) — British Security authorities said snap checks will still be carried out and troops dismantled checkpoints in Northero Ireland's second city tonight checkpoints will be manned around the old city walls bordering day for the first time since sectarian Catholic areas and a Protestant quarter enclave across the River violence erupted there in August, Foyle which divides the city.

Colby Approves Slaying Amin

CHICAGO, May 25 (UPI) -Former CLA Director William Col-by said that he doubts that Idi Amin will die a natural death and believes that it would be "moral" for the Ugandan people to kill their

Mr. Colby also said in an interview in the July issue of Playboy magazine that the CIA could morally aid in the assassination of a foreign tyrant "if the safety and welfare of the United States could somehow be related to it." The former intelligence director said that he believes "if a man is a total tyrant, then somebody under him has the right to shoot him.

"But that doesn't mean a sepa rate country has a right to do it. If I am being oppressed by someone — my tamily has been destroyed, I've been sent to jail and all the rest— then I have the right to respond." He said, for example, that he felt it would be a "moral act" for the Ugandan people to kill Marshal Amin, adding that he doubted that the Ugandan leader would "die a natural death."

EEC Budgeting \$12 Billion for Food Subsidies

BRUSSELS, May 25 (AP) - The European Economic Community is planning to spend about \$18 billion next year - nearly two-thirds of it

to keep food prices high.

The proposal for the 1979 budget
by the 13-man European Commission, the Common Market's executive, was presented to the press

It is subject to considerable change before it is adopted by the representatives of the nine govern-

The spending of the governments through the Common Market will be close in 3 per cent of what they spend separately in their national

tween Vice Adm. Harry Train, commander of the U.S. 6th Fleet. and the French commander in the Mediterranean is the basis for naval cooperation there. Sources at NATO headquarters bad predicted that France would materially sup-port the Zaire government if the in-vasion of Shaba province in Zaire continued. France dropped 400 paratroops into the province Fri-

French air and ground forces also are in action in two African trouble spots whose security is of importance to NATO. For the last few months French Jaguar fighters have been attacking Polisario guerrillas threatening Mauritania from the western Sahara. The guerrillas are supported by Algeria, which in turn is armed by the Soviet Union. France's aim is to prevent the Polisario from overrunning Mauritania and thus isolating Morocco, a stable French ally.

French in Lebanon

Other Jaguars and about 1.200 troops, according to NATO estimates, have been sent to Chad to support the government forces under attack by Arab rebels from the north. The rebels have been provided with Soviet equipment by Libya. France also accepted the burden of providing a contingent for the United Nations peacekeeping forces in southern Lebanon.

French industrial and commer-cial interests are powerful in those countries. Lebanon, which was under French mandate for two dec-ades after World War I, is to some extent a French creation.

French military authorities, interviewed in Paris, conceded that although their government had an obvious interest in the security of

its former possessions and present client nations in Africa, Prince must be prepared to cope with global Soviet challenge. The Resians, in their view, will exert mistary power wherever they see a va-

Could Cut Oil Imports

U.S. Investigating Ways To Turn Waste to Energy

By Walter Sullivan

NEW YORK, May 25 (NYT) --In 1975, U.S. cities dumped or bur-ied 130 million tons of waste. Had it been burned as fuel, the Energy Department estimates, it would have reduced by 7 percent the need of the United States for oil imports.

Although the day when most of this waste is used as an energy source seems distant, a number of projects to exploit it are under way, as are efforts to improve wasteburning technology.

Engineers, public-utility executives and officials met recently in Chicago to hear reports on the latest developments in this field. Some efforts are highly innovative, while others follow Europe's more fully established technology.

The meeting was organized by the American Society of Mechanical Engineers as the eighth biennial National Waste Processing Conference and Exhibit. Among the projects discussed were two — in Ames, lowa, and Akron, Ohio — in which medium-sized communities are expected late next year. seeking to fill some of their energy needs by burning their garbage.

The project in Ames provides

shredded waste to supplement coul producing steam for the municipal power plant. Each hour four tous; of refuse, collected from throughout the country, are blown into boilers 13 feet above a bed of burning coal, five tons of which are consumed hourly. The waste-processing facility was

built at a cost of \$5.8 million, large ly from a local bund issue, Th plant, which went into operation is 1976, serves about 65,000 persons. In Akron, an energy recycle sys-

tem is being built to hum 1,000 tons of waste daily, supplying steam to 253 downtown users and an adjacent plant of the B. F. Goodrich Co. No electricity will be generated. Downtown Akron has hitherto

been provided with steam by the Ohio Edison Co., but this service will be taken over by the new system. Large customers will include the University of Akron and several hospitals. The project is hudgeted at \$31 million, with completion

Additional Revenue

A first-year revenue of \$6.1 ml lion is expected from steam sales Additional income will derive from sale of iron extracted magnetically from the waste after it has been shredded.

The lightweight fraction of the waste, to be burned, will be sepa-rated from the metals and glass by air jets and will then be blown in a Babcock & Wilcox steam-general ing furnace. The furnace can be oilfired to an emergency to maintain steam service to downtown custom-

Two plants that would generate electric power from bulk waste hurning and sell it to regional pow-er systems are projected. One, in North Andover, Mass., would pro cess 3,000 tons of waste daily and sell power to the Massachusetts Electric Co.

According to UOP Inc., formally the Universal Oil Products Co. which is expected to be the prime contractor, negotiations are in the final stages and construction is to start next spring. To maintain pow-er production, refuse delivered must be assured from 50 communities in northeastern Massachuseus and southern New Hampshire.

\$95 Million

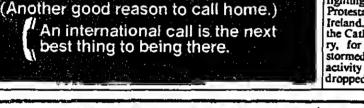

Costing \$95 million, this presum-ably would be the largest such plant in the country. Negotiations also are under way for construction of a similar UOP installation in Pronellas County in Florida near St.

Petersburg.
The Chicago Northwest plant began operation in 1970, but it has never sold any steam. According to UOP engineers, it was originally envisioned as a system for clear waste disposal rather than as an exergy source. They say, however, that it will soon begin selling steam to a nearby candy factory.

In the country as a whole, indus trial use of stearn from refuse mein eration is relatively widespread.

More sophisticated methods un der trial have proved far more challenging than expected howers. Notable among them is pyrolysis the cooking of material in the absence of oxygen until it breats down into gaseous, liquid and solid constituents,

The resulting gas and oil are flammable, and the solid residue can be burned like coal. In a version of the process known as Land-gard, developed by the Monsanto Co., waste inside a kiln is dued. P. rolized in n "starved air" environ ment, then burned after some gas has been drawn off to provide clean fuel for burning smoke particles.

Love for Former Italian Victim Disastrous for French Kidnapper

ROME, May 25 (AP) - The dream of a Frenchman who had fallen in love with the young woman be had kidnapped for ransom (1) was shattered yesterday by police. He had desperately tried to see her again after she bad been ransomed by her father.

The woman, Giovanna Amati, 19, was kidnapped by Jean Daniel Nieto. 31; of Marseilles. Police said that he acted as one of two jailers during her 74 days in captivity.

Miss Amati was abducted on Feb. 12 in Rome and released on April 27 after a ransom of 800 million lire (\$880,000) had been paid. Several persons were arrested, but a man and a woman es-

caped with the money, police said. Mr. Nieto, however, remained in Rome and frequently rang up Miss Amati's house asking for her. After consulting with her parents and police, Miss Amati agreed to date Mr. Nieto.

As she had agreed over the phone, she rode her motorcycle up and down the Via Veneto until Mr. Nieto turned up. Police waiting in ambush grabbed him, and, after a brief scuffle in which several shots were fired, subdued him.

Larry Cadwell, the song leader, conceded that neither be oor the viano player knew any. Chinese music, so they sang "Chinatown." Han Hsu smiled. Hsu smiled. Their wives smiled.

Rep. Findley dashed over and hispered in the song leader's ear. Mr. Cadwell said he had had a request for "Smile and the World Smiles With You." They sang it. Everybody smiled.

Then Rep. Findley gave a slide show on his latest trip in China, as part of an 18-member Illinois agricultural delegation. He is a strong advocate nf increased trade and full normalization of relations with

After the slide show, Rep. Findlev introduced Han Hsu, noting that the diplnmat often had worked closely with the late Chairman Mao Tse-tung and Premier Chou En-lai. If any of you were asked to list

the 10 people in all history who have had the greatest impact," he said, "I think every list would bave "You have a very outstanding congressman." Han Hsu said. He's trying to enhance the understanding between our two peoples and develop the trade between our

Tough on Taiwan

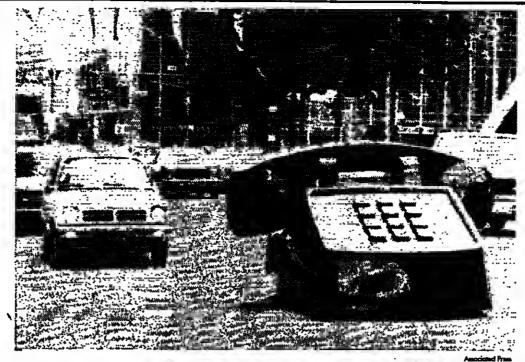

two peoples."

He declared that the Chinese were "looking forward on the ques-tion of normalization of relations," but that the issue of Taiwan, on which Peking "brooks no interference" was a harrier to that Then he added: "We hope the friendship between our two people will last from generation to generation." That brought standing applause from the Rotarians.

Although college officials ac-knowledged that there had been some grumbling among alumni and townspeople about inviting a Com-munist to address the class, the 1,000 or so students, faculty mempers, parents and friends welcomed Han Hsu in apparent good spirits.

They seemed somewhat puzzled by his references to the troubles visited upon his country by "the interference and sabotage from Liù Shao-chi, Lin Piao, and particularly from the 'Gang of Four.' " But most of the onlookers cheered the part about friendship lasting from generation to generation.

"It was a lot of propaganda, but he has a right to believe what he wants," an elderly, red-faced man said benignly. "God gave us brains to think for ourselves.

NOT IN SERVICE — The 8-foot-long mock-up of a telephone shown in this file photograph is normally mounted on a compact car and driven to various events around the Denver area for promotional purposes by Mountain Bell Telephone Co. But someone unbolted the phone and made off with it Monday night, and now Mountain Bell is unable to complete its calls.

Says 72,000 Chinese Driven Out

Stop Expulsions, Peking Warns Hanoi

HONG KONG, May 25 (UPI) — toward Chinese residents and de-china has warned Viennam that un-China bas warned Vietnam that un-less it stops expelling Chinese refu-gees with little more than the clothes on their backs, it must "bear full responsibility for all the consequences.

In a sharply worded statement transmitted yesterday by the Chinese news agency, the Overseas Chinese Affairs Office said that the situation of Chinese living in Vietnam "has been deteriorating daily."

Peking charged that more than 50,000 Chinese were driven out of Vietnam from early last month to the middle of this month and "up in now, the number has exceeded 72,000, not counting those who were compelled to ... seek refuge in other places."

Some Were Besten The statement said that reports from border areas showed that the

heartily when he concluded with refugees had lost all their money personal belongings, some were beaten or wounded and "most had nothing left except the clothes It charged the Communist regime in Hanoi with taking "arbitrary, truculent and illegal actions"

"Otherwise," the statement said, "the Vietnamese government should bear full responsibility for all the consequences arising from these unwarranted measures.

li said that, in accordance with the policies of the late Chairman Mao Tse-tung, citizens of border areas "are pooling manpower and supplies, warmly receiving and ap-

N.Y. Crash Kills 4 On Army Helicopter

NATURAL BRIDGE, N.Y., May 25 (UPI) - Four reservists from New Jersey were killed vesterday when their Army helicopter crashed and burned near Fort Drum during training.
The UH-1H Huey medium-sized

belicopter burned in a wooded area inaccessible by land vehicles, an Army spokeswoman said. A helicopter was sent to recover the bodies. The names and humetowns of the victims were not released.

propriately settling the victimized

The statement came at a time when relations between Peking and Hanoi were already strained be-cause of China's support of Cam-bodia in its border conflict with

The East German news agency, ADN, reported today from Hanoi that China had withdrawn all of its' technicians working in Vietnam under aid agreements on about 20

Several months ago, Hanoi started a crackdown on Chinese busi-nessmen in the Cholon section of Ho Chi Minh City, formerly Saigon, where hundreds of thousands of Chinese merchants flourished for years.

The Peking statement said that the Chinese in Vietnam fought against both the French and the Americans in two Indocbina wars, "never flinched from bloodsbed and sacrifice," and now are being expelled en masse.

Over this, we cannot but feel strong regret and indignation," the Overseas Chinese Affairs Office

Israelis Denounce WHO **Over West Bank Censure**

By Dial Torgerson

JERUSALEM, May 25 — Israel yesterday accused the World Health Organization of ignoring a report of its own investigators in voting a condemnation of Israeli medical services in occupied areas.

Three medical experts from the organization, an agency of the United Nations, spent three days on the West Bank last month and issued a report earlier this month which, although it contained some favorable points, was generally critical of Israel.

Israel charged that the resolution adopted Monday by the WHO assembly in Geneva ignored the early report, "which, even with all it noesidedoess, could not ignore the positive reality, and which referred in improvements which have taken place in those fields that the committee investigated."

The investigating team's report found "depressinn and sadness" among prison inmates and reported finding that "there is nn possibility nf physical and mental and social welfare when the population is sup-posed to live in conditions of occupation." But it found some positive elements, saying "the sup-ply of medicines is reasonable" and citing "an increasing number of

doctors."

The assembly resolution, on the other hand, accused Israel of inhumane treatment of Arab prisoners and "arbitrary practices affecting the physical, social and psychologi-cal health" of the inhabitants, and mentioned no good points at all.

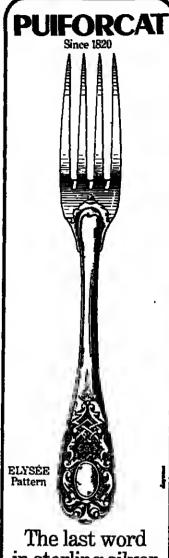

The resolution un Israel was pushed through by votes of 22 Arab. African and Communist countries. Israeli officials cited is as an example of what they called the subversion of a UN special agency's defined functions to use it as a propaganda tool.

"I was shocked when I saw the investigators' report," said Dr. Yitzhak Sever, chief medical officer fur the occupied West Bank. "I couldn't believe the hypocrisy, to see them seeing white and writing black. Three high-placed doctors with two faces — 1 couldn't understand it."

The report, prepared by WHO officials from Senegal, Romania and Indonesia, made statements that Dr. Sever said were incorrect: That no new hospitals have been built since 1967 (a 101-bed hospital was opened at Nablus in

1967. Dr. Sever said). • That there was no improve ment in the basic medical organization (clinics and child care ceoters are said to have increased from 112

• That there are few registered nurses (West Bank ourses reportedly have increased from 237 over the last 11 years to 562, including a corresponding increase in registered nurses among them). · Los Angeles Times

Italian cars drive so well because Italian roads are so difficult.

If you want to see how well your car performs, visit Italy.

Because only 5,500 out of 291,000 kilometres of our roads are autostrade. So much of the driving in Italy is over difficult roads.

In fact, Italy is 1/3 mountains, more than any other car-producing nation in Europe.

And, because of this, Italian cars have to be able to steer, brake. accelerate, and feel the road better than other kinds

And the automobile makers of Italy have concentrated on performance for so long now that there's such a thing as a car having an "Italian feel."

And this is particularly true of

Fiats. At Fiat, every car we make has to have this "feel" or it doesn't get made. We test drive each of our

prototypes for hundreds of thousands of kilometres on test roads and real roads like the ones you see here.

And our test drivers and engineers fine-tune each prototype until it meets our specifications.

And until it can handle our roads. And if a car can handle our roads, it can handle practically any country's roads in the world.

As the French say, "Ce qui peut le

plus peut le moins." (That which can do a lot can also do a little.)

Fences and Neighbors

The special disarmament session of the United Nations was not anueipated with any great amount of hope by most of those involved.

Except for the official position of the Soviet Union in favor of total disarmament (which really means that the Kremlin professes to want all but is unwilling to settle for much in this field), the prevailing mood seems to be that strong fences make good neighbors. And Vice President Mondale, standing in for an unusually shy President Carter, put forward the rather ingenious theory that early-warning systems could serve as the "eyes and ears of peace."

This is a natural extension of the strongfence theory — it implies that fences could be sereens for impending attack that the early-warning devices could frustrate. This idea might be carried further if systems could be devised to determine just what neighbors lie behind the fences.

For example, is it Angola that is the neighbor of Zaire, or an armed assemblage of rebellious Zaireans? And is Lebanon Israel's neighbor or are the Palestinian guerrillas? The same applies to Rhodesia and the socalled front-line states, or Cambodia and Vietnam. The world powers have a huge collection of explosives at their ostensible command, but the triggers and the fuses are quite likely to be at the disposal of relauvely small groups, chiefly equipped with relauvely small arms.

lems of controlling the arms race. The talks over strategie arms, between the United States and the Soviet Union, and the East-West discussions of the European situation in troops and weapons, are extremely complieated. But when to these subjects are added the perils that arise from combat in exotic regions over assorted aspects of nationalism, tribalism, and ideological and personal drives, even the strong-fence mood seems insufficient to meet the case.

What has to be done is a patchwork of withholding arms sales, of fostering conferences over differences, of reducing accumulauons of both conventional and nuclear weapons, of attempting to insert some rauonality into the emotions and aspirations that drive men to war on their fellows. For this purpose, the UN disarmament session can promote useful ends, even though it is obvious that it cannot produce any simple answer to this very complicated and deep-rooted prob-

To say that force must never be used is to disregard the fact that if a democratic world held to that concept a Hitler could overcome the democracies. While the impulse to force exists, whether it uses nuclear bombs or paving stones, many can be hurt, in their persons, their property or their institutions. It is the impulse that must be controlled, somehow, and the control of arms and men-at-That constitutes one of the major prob- arms is only a part of that intricate process.

The energy bill is making its way through Congress like a man trying to fight his way through a raspberry bush. As he cautiously unhooks himself from one bramble, three more entangle themselves around his legs. The bill has now moved forward another couple of inches. But it is sull far from certain that anything of significance will be passed in this Congress.

The bill has been stuck since last fall on one crucial point: whether to end federal price controls on natural gas. The latest development is a vote by the conferees in favor of a decontrol formula. The closeness of the vote accurately suggests the degree of enthu-siasm and unanimity that the compromise evokes.

At this stage, after seven months of bickering and whittling, nobody has much to say for it except that it seems more likely to pass than any other. The people who want controls are angry because this settlement abandons controls in principle. The people who want an end to controls are deeply suspicious because the settlement postpones it for at least seven years. Both sides know that the complexity of the compromise will make it tricky to administer.

It is now quite clear that the Carter administration made a grave mistake of political judgment when it drafted the gas section of the bill. The rest of the bill followed the strategy of raising prices on scarce fuels to hold down consumption. But on gas, the bill proposed the exact opposite: continued controls to maintain artificially low prices. It was a strange decision, since President Carter had flatly promised during the campaign to support decontrol. Certainly all the economists around Mr. Carter understood the dangers of continued controls.

Apparently, the president chose to stay with controls as a matter of simple expediency - because he thought that the Congress would not pass a decontrol bill. As it turned out, he was joining the weaker side of the argument. When he did that, Mr. Carter created an impasse in Congress that now only seems - slowly, uncertainly, and with a thousand conditions - to be dissolving in favor of decontrol.

Let us suppose this compromise on gas holds up. Will an energy bill be passed? After it zipped through the House last spring, the Senate knocked it into five parts. It passed three -- on conservation, the industrial use of coal and utility rate structures — before it choked on the fourth, gas pricing. The fifth part is the tax on crude oil that the administration has repeatedly described as central to everything else. There is a widespread opinion in the Senate that it will never be passed, but some of the House leaders seem determined to keep pressing. Whether a large and complicated tax can be negotiated and enacted in the summer before a congressional election seems, at best, dubious.

Part of the trouble is this country's short memory. As long as the lights go on and there's gasoline at the pumps, most people in the U.S. resist any change in the national habits. But another part of the trouble is ineptitude and miscalculation at the White House. Thirteen months ago, the president made a series of addresses in which he pressed, in terms of the utmost drama and urgency, for this legislation. Since then nothing has been enacted, and even Mr. Carter has seemed to be only intermittently concerned about it. It's a strange episode in U.S. political history.

At present, there is really only one force pushing the bill forward: an undercurrent of concern, in Congress and in the country, that it would be a very bad sign, for reasons that go far beyond energy policy, to abandon the job or leave it to another year. It would be a rather ominous suggestion that the instituuon had broken down, that the government had run out of resolution, that Congress had been faced with a hard question and, in the end, couldn't find any answer at all. The central issue is no longer gas and oil, but the government's ability to make up its mind.

WASHINGTON POST.

Science Friction

Two dozen U.S. physicists have canceled trips to the Soviet Union to protest the harsh sentences - seven years in jail and five awny from home - imposed on Yuri Orlov, a Soviet physicist. Emphasizing the issue of human rights in Soviet-U.S. exchanges, Dr. Philip Handler, the president of the Nauonal Academy of Sciences, warned that if the trials of two other dissenters. Alexander Ginzburg and Anatoli Shcharansky, turn out similarly. Soviet-U.S. scientific relations will have been profoundly damaged.

There are, of course, other opinions in the

scientifie community. Some believe that scientists should stick to their microscopes; some even argue that boycotts can be harmful to U.S. research in nuclear fusion and other fields. But we applaud the scientists who have taken the first steps in this boycott and those who are prepared to back up Dr. Handler's warning. It is only through such gestures that influential Soviet officials may be brought to understand that the mistreatment of dissenters - above and beyond suppression of dissent - will have a cost.

PRETORIA—As a responsible counteractions to preserve law and order, and to continue our evolu-I member of the international community. South Africa finds itself in a unique situation, designed separately by the United States and the Soviet Union to yield a single result: propel South Africa, within its own inalienable territory, on a

self-destructive course. deal realistically was On the one hand, the short-term African realities. objective of the Jimmy Carter-Andrew Young administration is to force majority rule upon South Af-rica by so-called peaceful methods. These peaceful methods include such measures as trade boycotts, the withdrawal of investments, arms embargoes (including military hardware for use against external attack), severing alliances in sports and a long list of similar coercive instruments. Does the United States utilize similar peaceful meth-ods to win its way with other coun-

On the other hand, the Soviet Union shares the same sbort-term objective, but is employing Cuban proxy forces with the ultimate aim of establishing a Marxist system in Southern Africa. If successful, all democracy and freedom will disappear there. Has America forgotten

Superficial

A very superficial knowledge of the complexities of our plural soci-ety and history among certain Western governmental leaders has resulted in their governments and institutions becoming easy targets for a few South African detractors against their own country. It is regrettable, to say the least, that these governments lack the conceptual basis to steadily guide their own actions amidst the harrage of propaganda from unsupportable

The United States government, through its stated foreign policy objectives and priorities, has, unthinkingly, deeply involved itself in the plans of those who wish to destroy South Africa.

The administration argues that South Africa is not crucial to U.S. foreign policy. Yet we must conclude that President Carter has "internationalized" South African domestic affairs by selecting it as his personal target in his sweeping commitment to restore human rights globally.

The President's stated aim to, work for "majority government" even has special "guideline principles" formulated for the Republic of South Africa. In the absence of similar "guideline principles" for other countries, we South Africans. when looking at the rest of Africa, perceive a high degree of uncertain-ty on the part of the United States as it searches for what its role should be in other areas of the African continent. This is particularly true when everyone else (except for the Carter administration) is gravely aware of the gradual but steady Marxist inroads into Africa via Cubanization.

Double Talk

The truth of the matter is that by selecting only my country in all of Africa for the great American human rights experiment the administration's approach to the question of buman rights has be-come a cause celebre in an attempt to reshuffle the perceptions of its

If this is not the case, the administration is, at the very least, guilty of double talk or worse, practicing

selective morality.

South Africa has no ehoice but to detect racialistic overtones in the administration's statements - antiwhite racism. For it certainly can-not be denied that if South Africa were a black government, the Washington red carpet would have been rolled out long ago, even if we had committed the atrocities the world has witnessed in the countries to our north.

The fact that the administration has classed South Africa as a rigidly separated racial entity, while warmly welcoming some of the world's worst examples of buman slaughter and deprivation of rights, must be viewed by South Africans as a visible demonstration of the administration satisfying political and vocal special interests.

Imperfect

South Africa admits it bas imperfect laws and an imperfect society. All countries bave imperfect laws and the international community itself is an imperfect society. Yet the Carter administration refuses us the right to this admission. It that every action of the South African government is a clumsy and myopie overreaction in those cases where our unique political and strategie situation dictates that these are two ethnic components of the Soviet Union.

There are no textbook solutions or precedents for this situation. So it is only natural that South Africa must design its own instruments and adapt its internal policies to deal realistically with today's South Is it sheer coincidence that we

are guided in our actions by two of the tenets contained in the Monroe Doctrine? "It is only when our rights are invaded or seriously menaced that we resent injuries or make preparation for our defense" and "We should consider any attempt ... to extend their system to any portion of this bemishpere as dangerous to our peace and safety."

The United States has recognized the Union of Soviet Socialist Republics as a monolithic state even though it is composed of 15 different ethnie republics. It shares, cheek by jowl, United Nations benches the three three Byelorussian Soviet Socialist Republic and the ethnie Ukranian Soviet Socialist Republic, never acknowledging

Universal Worry In Middle East: Who Speaks for U.S.?

By Anthony Lewis

asked an interviewer questions about it. King Hussein said he watched it with anxiety. President Anwar Sadat was confident about it. Israelis from Menachem Begin

to the taxi driver talk about it all the time.

Arab or Israeli, people in the Middle East fret about the attitude of the United States. To a reporter of the United States. To a reporter making a swing around the area, the universal concern with the United States is a striking feature of the landscape. What does the United States really want? How strongly will it push for its objectives? Who speaks for the United States? The questions are endless.

Of course, the two sides an-

Of course, the two sides approach the questions from opposite viewpoints, historically and psychologically. The Arabs are earnestly seeking U.S. belp to get the concessions from Israel that they concessions from Israel that they say are necessary for a settlement. The Israelis are desperately — obsessively is not too strong a word — trying to hold on to the U.S. support that has sustained them for 30 years. What the Arabs and Israelis have in common is susceptibility to illusions about the United States.

Misconceptions

It has been said for years that the Arabs tended to decrive themselves about what the United States would or could do in the Middle East. Last week it turned out that rast. Last week it turned out that Israel too, with all its experience and insight in dealing with the United States, could disastrously misapprehend a situation.

The Senate vote to uphold President Carter's package of plane sales to Israel, Egypt and Saudi Arahis let loose an outcomin Israel Prima

loose an outcry in Israel. Prime Minister Begin spoke darkly of "some who are trying to dictate peace terms to us." The Labor op-position attacked him for making the case against the joint sales too

Something much deeper than a political reaction was involved: a heart-searching, really. Why was it so profound? Why had the Israeli

our trust. They should earn it. CHRISTINE FREMANTLE.

Gen. Jones

As one who knows no more about

our JCS chairman, Gen. David Jones, than he has read in the arti-

cle by Rowland Evans and Robert Novak against him (IHT, May 12), I would like to come to his defense

against the accusation of being a "conformist." The statement of charges: He "not only embraces

but energetically applauds ... those

Carter administration initiatives

considered dubious elsewhere at

the Pentagon," thus causing "con-cern within defense circles."

civilian authority I find what I read reassuring. A chairman whose "ex-

ecutive competence ... nobody

questions," and whose conformity

tends to be with civilian anthority

is much less disturbing that one

who conforms with the characteris-

the zealoury of "defense circles" of which Generals LeMay and Walker

are even better known exponents

than Gen. Singland. Military men

are under overwhelming pressure to conforn with it. Since Gen. Jones

evidently knows how to resist it, he

MARK PRICEMAN.

looks like a nonconformist to me.

Boulogne, France.

Different Hours

H. Tanner's article of May 18 on

Italy terrorists states that everyone in Italy arrives at the office be-

tween 9 and 10, goes for lunch and

after 5 p.m.
I suppose this applies to Rome's

ministerial staff, but it does certainly not apply to millions of workers

in industry and commerce working

break for lunch, five days a week.

a.m. to 5 p.m. with a one-hour

FRANCO VERZELLONI.

siesta at 1 p.m. and back to office:

As a believer in the constitution-

subordination of the military to

ploit them.

TERUSALEM-Yasser Arafat lobby in the United States waged lobby in the United States waged such a biner campaign in a cause that officials bere now say they knew they could not win? Why did Israel care that much about the sale of F-15s to Saudi Arabia, a conservative and militarily weak Arab state that it surely prefers to see linked to the United States?

Israel had military and political

linked to the United States?

Israel had military and political objections to the Saudi sale. But the deeper concern was surely symbolic. For the first time U.S. defense assistance to Israel was linked to a military relationship with Arab countries. Israel's sense of exclusivity in the Middle Fast relationship. ity in the Middle East relationships of the United States was sbattered.

Dependent

Moreover, Israel is increasingly dependent on the United States, economically as well as for military equipment, and deeply resents that. It conflicts with the old Zionist ideal of Jews emancipating themselves by building their own, wholly inde-pendent life in a state of their own. Sen. Abraham Ribicoff, a longtime supporter of Israel who cast an influential vote for the plane sale, made the point that U.S. economic strength is now tied to Arab oil, and that Israel, which needs a strong United States, thus bas an interest in good U.S.-Saudi rela-tions. Failure to grasp that change of reality evidently led Israel into the miscalculation of the plane deal battle and then into overreaction,

including talk about ann-Semitism. Many Arab leaders, for their part, are still puzzled by the complexities of the U.S. constitutional system. In all of the states bordering Israel, President Carter is praised for trying to achieve overall peace in the area and for taking a more even-handed position. But why is it, then, as the Beirut newspaper lke asked, that he failed to "impose a just and durable peace settlement on the Israelis?"

Chairman Arafat of the Palestine Liberation Organization asked a question that this reporter later heard a dozen more times around the area: Why can't Carter be as strong as Eisenhower? Eisenhower is a favorite with the Arabs because he forced not only Israel but Britain and France to give up their Suez venture in 1956.

Personal Aura

The answer any informed person portion of educated people distrust in the U.S. would give is that Eisenbower was a war hero with a great the scientists and technocrats: neutron bombs, thalidomide, Windspersonal aura, and he was president cale, atom-powered satellites falling before the office had been wound-ed by Viennam and Watergate. But the answer, though listeners take it out of the sky, and a host of other terrors are the result of their labors. They take no responsibility for their discoveries, but self-righteousin, does not always entirely per-

ly carry on putting lethal weapons in the hands of any who would ex-One leader who has actually been in power since Eisenhower's day und who thoroughly under-We should not give the scientists stands the United States is King Hussein. Last weekend, he expressed great concern about "the state of confusion" in the United States today, the limits on the administration's ability to act in foreign affairs.

fn the 1950s, he said - again the Eisenhower reference — "You were able to decide. you were able to move in a coherent manner and a strong constructive way. The enormous task for today is to regain that degree of cohesion and strength. We obviously watch all

these developments with great interest and anxiety." But the Arab who holds the current prize for dealing effectively with the U.S. system is Sadar. Whatever else be achieved with peace initiative, be had a great of fect on U.S. public opinion and congressional attitudes. There would almost certainly not have been 54 votes for the plane package last week if Sadat had not made

such an impression on people in the U.S. since last November. Yet the Egyptian president may be banking too heavily on the Unit-ed States. While all the visible signs are that his initiative is failing, he retains hope because be has confidence in President Carter. No doubt Carter urgently wants to rescue the initiative, and he and his aides are doing everything they can to help as interlocutors. U.S. influence could be applied more effec-tively. But imposing a settlement is

something else.

No U.S. president now imagina-

ble is going to tell israel that it must agree to particular peace ternis. Apart from political restraints the responsibility would simply be too appalling in light of what Carter said last week reable commitment to the security of

If Arabs understood that, they might lower their expectations a little. If Israelis did, they might be less hysterical. U.S. leadership is essential if there is ever going to be a settlement in the Middle East, but is potential is not unlimited.

Susan Sarnadon has some forceful moments as the mother who longs to abandon her trade. Frances Faye is imperious as the ancient Madame of Raven Croak, Keith Carradine maintains mysterious reserve as the enigmatie photographer and Antonio Fargas smoothly entertains at the keyboard as the institute's professor and makes a cameo contribution as

The Hungarian entry. "A Very Moral Night," is also set in a brothel, one that flourished in a provincial puszta town in the last years of Franz-Josef's empire.

Derived from a story by the cele-hrated Sandor Hunyadi, it discloses the ladies of the parlor pretending to be coy virgins when the innocent mother of a popular client pays a surprise visit. Margit Makay as the bewildered intruder and Iren Psota as the cautibus madame brighten the humor of the emergency camouflaging. Gyorgyi Tarjan and Carla Romanelli, as two ol the girls, and Karoly Makk's direction bestows the mundane light touch Perhaps the film's festival appearance signifies that Hungarian scenarists are returning to the concoction of one of their national and most exportable specialties: the witty sex comedy.

"Violette Noziere" by Claude Chabrol is a beavy sex tragedy, a reconstruction of a notorious French trial of the 1930s. The young woman of the title was the red lights of New Orleans' charged with the murder of her father French Quarter, as is shown here.

Louis Malle's latest film, his first her mother and was condemned to the murder of her mother and was condemned to the murder of her mother and was condemned to in English, has a sleepy artificial the guillotine, though her sentence commuted to life imprisonmotion by Sven Nykvist's mood ment and she was set free some photography and the tingle of Jerry years later. Violette was a dual per-

CHEERLEADERS—In Cannes to help present "The Shout," Britain's entry in the festival, are British actress Susannah York, Polish director Jerzy Skolimowski (c) and actor John Hurt.

the pure schoolgirl, she was already in her teens a prostitute of the student quarter. Miss Huppert makes an amazing physical change in depicting the heroine's contrasting sides—now she is the pineh-faced adolescent and now, round-faced in her fur mantle, she assumes the size of Andrea Ferreol, who plays the ehocolate-munching wife in Fass-binder's "Despair." Her versatility is likely to be remembered when prize-day comes.

Karel Reisz's "Who'll stop the Rain?" begins portentously on the Vietnam front and then shifts to the United States, where returned veterans smuggling drugs lead the police a brutal chase. Nick Note is the Clift Eastwood of the occasion. Paul Mazursky's "An Unmarried Woman" relates how a deserted wife (Ell Clubwork) Folds consoler wife (Jill Clayburgh) finds consolation in the arms of an English painter (Alan Bates) amid Manhattan's bohemia. Its speech is New

Other Films

sonality and Isabelle Huppert also the star of another competing succeeds in suggesting her divided entry. Jerzy Skolimowski's "The career before the crime. Looking Shout." a macahre Robert Graves fantasy in which an evil wizard disturns the peace of the English countryside, having the power to impose death by uttering a cry that shakes the auditorium.

> More interesting than these selections of the official program are two to be found in other sections. "Alyam Alyam" ("Oh, the Days") from Morocco is the first film of a young cineast, Ahmed cl-Maanouni, and with it he makes an

Theft at Cardin Home

PARIS, May 25 (UPI)—Burglars made off with \$140,000 in cash, jewels and art objects from the home of French fashion designer he has drawn Pierre Cardin, police said today.

arises in a farming household when the elder son, on his father's death, is reluctant to replace him as head of the family. Performed by a nonprofessional peasant cast, it is en-tirely convincing in its interpreta-tion and the imagery of its composition has striking lyric quality. Maanouni, working with a two-man crew, has acted as cameraman in addition to writing and directing this impressive motion picture.

The Philippines is represented for the first time at the Cannes fes-tival by Lino Brocka's "Insiang." a novel and arresting study of Manila slum life. The strong theme is that of Benavente's "La Malquerida," with a mother's lover obsessed by imposing debut. In a subtle melange of documentary and dra-ma, it presents the conflict that the beauty of her young daughter and the resulting tragedy. Brocka has presented his passion-ridden tale with unswerving realism and from Mona Lisa as the insatiable mother and Hilda Koronel, a stunning young actress, as the daughter, he has drawn two remarkable

Using Bennett's Bend

How to Get a Better Grip on Things

By Larry Green

AST PEORIA III.—To hear John Bennett talk, he has invented the equivalent of the medicine man's clixir, something good for athlete's foot, toothaches, the plague and thinning bair,
Bennett believes his invention

will help eliminate tennis elbow, aid arthritis victims, make cooking easier, reduce the potential of swinger's wrist-something that bothers golfers-and make some persons ambidextrous.

The invention may turn some of us into better athletes, carpenters and writers, while reducing fatigue Sharps and Flats and tension, Bennett maintains.

What Bennett has come up with is a way to get a new grip on things. And it may be only a relatively short time before he throws all of us a curve. Not a hig curve-merely 19-degree bend.

Bennett would build that slight angle inin the ends of handles on baseball bats, tennis rackets, fishing rods and pool cues. He would put it on hammers and screwdrivers, on pots, spatulas and forks. He even thinks the curve will improve the performance of writing pens, bass drum muters, crutches, wheelbarrows and doorknobs.

The inventor, who is president of Couch and Heyle, a central Illinois industrial supply house, and head of an industrial problem-solving company called Think, has patent-ed his angle. In fuct, he holds a patent on every angle from 14 to 24 degrees, although he believes his 19-degree handle is the optimum.

Simply stated, "Bennett's bend" designed to turn the handle of any object used with the hands into a natural extension of the hand.

wrist and arm. The handle of this invention is specifically designed to utilize the natural angle between the gripping portion of the hand and the axis of

the forearm," the patent states. Because the handle becomes an extension of the arm, more force and leverage are generated while stress on the forearm is reduced.

For example, Bennett says, one test

force than the same blow from a hammer with a straight handle.

The curve seems also to give more stability to cooking pots and wheelbarrows.

Currently, Hillerich and Bradsby, manufacturers of Louisville Slugger baseball bats, is testing a bat with a curved handle. Similar tests are being carried out by a number of other manufacturers of tools and sporting equipment.

Bennett has researched the rules

June 1 at the Town Hall. This week's top single record in the United States is "With a Little Luck" by Wings, and in Britain, "Rivers of Babylon" by Boney M.

-FRANK VAN BRAKLE.

showed that a hammer with his of most sports and believes that he curve produced 32 percent more may meet resistance to his devices only in golf. "But golf is an art

form, nut a sport," be said. Couch and Heyle is already producing a curve-handled broom, and Bennett has created prototypes of a large number of objects he believes

will be improved by his angle. Bennett, who was an aircraft mechanic instructor in the Air Force and who holds a university degree in woodworking and sociol-ogy, said a shortage of Malaysian wood used in broom handles had

sparked the dawn of the curve age. When the wood became scarce, he created an aluminum handle and, while doing that, back in 1971, decided he would try to come up with a better broom grip. Bennett's

bend was the result. "All somebody had to do was look at his hand. There it's been," he said. "I didn't do anything. It's ne said. "I didn't do anything, it's just that everything we've got is wrong. I just made things fit the human being. If we grah it and use it, it works better if it becomes an extension of the human being."

Potential uses for his bend turn up constantly.

"There isn't a time that I speak tn a group that somebody doesn't come up with a problem," he said.
"The latest one was a long-distance bicyele rider who said the hands are the first thing to go because of the pressure on the handlebars.

"It works on anything we grah. Knives, spoons, boat oars and

rudders, cross-country ski paddles and ice pieks," he said, Bennett thinks his curve will have an important impact in developing countries, where much of the

Although he has created a number of other gadgets, this is his first

"If I'm going to do a joh I'm going to find an easier way to do what I have to do," Bennett said. The lazier you are the more you tend to be an inventor.

Wine in France

and be The Macon Tasters Prove Their Worth

By Jon Winroth

ACON, France, May 25 (1HT)—Despite the serious. ' nationwide scope of this city's an-Remail wine judging, its continued ex-teristence may be threatened by loss of official recognition. The European Economic Community deterlumines such things now and the fu-liture status of the Concours des w-Viosal Macon is up in the air.

The 24th wine judging recently beld at the Lycee Agricole of Davaye a little village near this city, put more than 5,000 sample bottles of wine from every region of France before some 1,100 tasters divided into three to five-person

The tasters run the gamut from three-star restaurateur Jean Troisgros - to anonymous red-faced peasant growers. They also include shippers, exporters, wine merchants, foreign importers of French wine, French government wine experts and a small but increasing number of women.

Ideal Temperature

from Barbet, president of the Concours, emphasized the seriousness and care with which it is done. Almost all of the samples come from the last two vintages, although a few older wines are enkered in consideration for a medal. the catries are submitted before May I and rest in a celler until the morning judging.

The whites are brought to Davaye in refrigerated trueks at 5 degrees centigrade so that by the time they are tasted, they are at an ideal 8 in 10 degrees. The juries sit around tables covered with white paper tablecloths and are furnished the now standardized, tulip-shaped French tasting glass, a napkin and bread and mineral water to clear

cheese alters the taste of wine. Each taster rates each wine be fore him hy checking a box marked "Excellent, Very Good, Good, All (convenable) Mediocre/Eliminated," for its "eye" (aspect), "nose" (smell), "mouth" (taste) and "harmony."

palate. No enecse, becau

Al least two of the tasters, Mr. Troisgros, a regular jury member at Macon, and first-time taster Becky Wasserman, an American starting up a barrel and wine-exporting iness from her home in Burgundy. share Mr. Barbet's conviction that the Macon judging is a serious, well-ordered event.

"I like to come here because the tasting gives me a general idea of the year in the region the wines at my table come from," says Mr.
Troisgros, "All the members of the juries are professionals and are severe critics. The growers, shippers, exporters, wine merchants and restaurateurs have different views on what is really good and what will sell. As a restaurateur, I'm at the end of the chain in direct contact with the consumers, my clients.

Yorkese and its approach is that of Greenwich village. Alan Bates is

"One taster at my table was from the Service des Fraudes and be tasted very differently from the way I did. He was very technical and analytical in his approach: how each wine was made-had it been heated during its fermentation, was it

tain excess sulfur dioxide, etc. "I simply look for wines that please me, wines with body, taste, character and that are not too soft. All my clients want to know is if a wine is good or not. I like lively, fresh wines that match my style of cooking. 1 like Burgundy young and Bordeaux old."

Mrs. Wasserman shared many of Mr. Troisgros' impressions: "I was really impressed by the time and care each taster took to study each wine. I thought it was very serious and I was very pleased to take part.

"We had all sorts of points of view because of the variety of taslers. The growers tended to give higher marks to the wines but they were also the most knowledgeable about how the wines were made and what had gone wrong among the less good ones."

Asked if she thought women tasted differently than men, Mrs. Wasserman stated flatly, woman's point of view is no different than a man's." Amen.

Par Avion.

Air mail. On Moy 16, 1930, the formed French pilot Mermoz landed at Rio de Joneiro with 130 kilos of moil. The flight from France had taken a total of four days. Thus was the first commercial line between France and South America born. It was the beginning of a great friendship, now almost half a century old Today, Air France serves 11 major South American cities with a fleet of aircraft uniquely composed of 747's and Concordes. The journey from France to Rio can now be flown in 7 hours vio Concorde; the trip from Paris to Coracas takes only 6 hours vio Concorde.

Air France has always been the pioneer of South American oir routes. Our newest route, Paris-Manaus-Lima, shortcuts right through the Amazon jungle. When your destination lies in South America, fly there with the experts: Air France. The people who opened a continent to the world.

\$215 Million Seen Extended

Bank Group Committed RaleTo Zaire Despite Strife

By Jack Egan

NEW YORK, May 25 (WP)-A consortium of International banks is till committed to lending the embattled and financially strapped govern-nent of Zaire an additional \$215 million despite the recent fighting in hat country, an official of Ciobank said yesterday.

Gifbank leads a syndicate of more than 60 banks which, after more han a year of difficult negotiations, submitted the loan proposal to the aire central bank just days before rebels invaded mineral-rich Shaba rovince. Shaba, with its copper, cobalt and diamond mines, is the source of about 70 percent of Zaire's foreign exchange earnings.

The changed situation has not impacted the loan," said James Abbott. Ciobank vice president who is normally based in Zaire. "Our anocipaion is that this loan will be extended."

However, some bankers in the syndicate yesterday questioned whether aire - already a near-basket case among international borrowers ould now meet the repayment terms called for in the five-year loan ecause of the damage to its economic infrastructure and the need for an nmediate infusion of funds — above the \$215 million — just to get the ines back mto operation. But the initiative on the loan now seems to lie with the central bank of

"The ball is in Zaire's court," said one banker. "If they were to say, let's gn tomorrow, the banks would say, if you feel you can meet the committent on the loan, we'll go ahead with it." He added there exists "a pretty solid front among the banks" in the aire syndicate, and said that "it would be incorrect to say the banks are

acking off from the loan." That does not mean the banks could not extract themselves from the an commitment if they wanted to, he said, by citing the intervening vasion as a reason to reassess the situation.

Self-Interest in Loan

Self-Interest in Loan

"If you could have a force majeur in the international lending field, it ould have to be a situation like this," the banker said. "I don't think a rudent finance minister would hold a gun to an international banking andicate's head for what he could get out of it."

The banks, however, have a certain self-interest in extending the new condition is that Zaire, in return for \$215 million, repay

pan, because one condition is that Zaire, in return for \$215 million, repay pout \$135 million to the banks for previous loans extended to the Afrin country on which it has been in arrears since 1975.

Without the new credit, Zaire could quite conceivably default on the ore than \$400 million in private-bank debt it owes, forcing some large nte-downs by the commercial banks.

One Wall Street banking analyst yesterday voiced the view that the cent ontoreak in tighting in Zaire could actually prove beneficial for the

cent ombreak in uguang.

Sition of the banks.

"In some cases the best thing a country can do is lose a war," be
"In some cases the best thing a country receive some substantial states or internasistance from friendly governments like the United States or internamal agencies like the International Monetary Fund to help bolster its onomy, and that this in turn will help bail out the banks.

An IMF mission in fact returned from Zaire just last Thursday. And, cording to sources at the fund, "discussions are continuing" on the tablishment of further IMF standby-loan facilities for Zaire. Such a andby is one of the conditions the private banks are requiring before the 115 million loan can be completed.

The World Bank has about \$135 million in loans for nine projects in control of the its "pipelines," but the recent invasion is expected to delay action most of these pending loans, AP-Dow Jones reports from Washington.]

Belgium Cobalt Prices Rise 24%, U.S. Considers Ban on Exports

e price of the cobalt it processes has sufficient cobalt stocks to supr Zaire 24 percent or \$1.60 a ply clients "for the moment." and to \$8.50 a pound. The Belun company is the sole processor Zaire's cobalt, which is used to rden the blades of aircraft jet

Meanwhile, in Washington, the Commerce Department is considering banning exports of cobalt from the United States. The U.S. imports all its cobalt and usually exports small amounts of scrap and waste, market sources say. Washington has a 40.9-million-pound stockpile, about two years' normal require-

'Not a Monetary System'

Bankers Criticize Funds Flows

system for managing money flows among nations is a jerry-built structure that does not please anyone, judging from talks with bankers gathered here for the International Monetary Conference.

But there is no agreement on a substitute. "It's a communication system, not a monetary system," said one banker. "All we can do is improve our communications because we can't achieve other improvements."

Although the meeting usually is addressed by top government officials, as this one was by Treasury Secretary Miehael Blumenthal, it traditionally is an arena for informal discussion. This nne was no exception and, more than usual, the talk was calm and relaxed, despite what many bankers recognized as continuing severe strains in the flows of payments among nations and uncertainties in the foreign-exchange market.

Discussion at the closing session yesterday focused on what Mr. Blumenthal called the "nutsand-bolts job of making the flexible exchange sys-tem work." This system, which was formalized last month with ratification of amendments to the charter of the International Monetary Fimd, permits currency rates to fluetuate in exchange markets according to supply and demand, with some management of the rates by central banks to avoid disorderly markets.

Provides for Surveillance

The system provides for IMF surveillance of central bank and government financial policies, in hopes of discouraging artificial efforts by one country to gain trade and monetary advantages over other nations. It calls also for cooperation and good-faith negotiations among financial officials.

"The new system represents an important evolutionary step among a clear historical trend, a move away from trying to impose exchange stability on naoons by some external means and toward the concept of placing directly on nations the responsi-bility for developing exchange stability by follow-ing sound underlying economic and financial poli-cies; it is a move in the right direction," Mr. Blu-

them was Jeremy Morse, chairman of Lloyds Bank of London and the former head of an IMF committee that attempted unsuccessfully to restructure the system of fixed exchanged rates that broke down in the early 1970's under pressure of massive imbalances in international money flows.

Gabriel Heuge, chairman of Manufacturers

Hanover Trust, noted that the present system depends on "judgment rather than rules." He asked whether "moral suasion" by the 1MF could be depended on to maintain international cooperation.

Conducive Policies

Mr. Blumenthal responded that the new system does not provide any sanctions that the IMF could use to force a country to follow policies conducive tn monetary stability if the country itself wants to pursue another course. But he said moral suasion could be a powerful force, especially if a country's currency is depreciating in world markets. More-over, he said, "I do not believe any system can prevent disturbances in a situation where major countries follow policies which make for substan-tial differences among them in inflation rates, rates of growth and other variables."

He threw cold water on a suggestion to change

the rule of the dollar as a reserve eurrency — a currency other central banks are willing to hold as an asset. "The decline in the dollar's exchange rate whieb occurred during the latter part of last year and early munths of this year had little to do with the dollar's reserve currency role," he added.
"There was not a lot of switching of reserves out of dollars during those months."

Better cooperation among government financial leaders was urged by Fritz Leutwiler, president of the Swiss National Bank. He said there bad been recent instances when one central bank would intervene in fnreign-exchange markets by selling a currency while another central bank was buying the same one. In addition, he said, the central banks need a better definition of "erratic markets," the kind of markets in which they are permitted to intervene by international agreement. "The alarm bell could ring on fluctuations beyond I percent per day, for example," be said,

ICI Net Declines 14% for First Quarter

ain's largest manufacturing company, said first-quarter net profit fell year earlier but fell 3.7 percent 14 percent to £60 million from £70 from 707.2 billion yen in the first million a year earlier on sales of half. £1.06 billion against '.19 billion.

However, pretax profit rose to £112 million from £69 million the previous quarter. ICl said more than half of the improvement was due to the movement in the value of sterling and the resulting effect on the sterling value of export debts and the net current assets of overseas subsidiaries.

Hitachi Net Up 3.6%

percent 4.89 billion yen (about \$21.4 million) from 4.5 billion a year earlier on sales of 441.3 billion yen against 473.43 billion yen. The dividend was unchanged at five

Teijin's Net Drops

TOKYO, May 25 (Reuters)— Teijin's net for the year ended March 31 fell to 404 million yen (about \$1.8 million) from \$2.59 billion yen a year earlier on sales of 346.15 billion yen against 349.52 billion yen. The dividend was raised to five yen from four yen.

Beecham Profits Rise LONDON, May 25 (AP-DJ)-

Beecham Group's net profit for the year ending March 31 rose 11.2 percent to £78.1 million against £70.2 million a year earlier. Sales increased to £866.1 million from £720.8 million. The diversified pharmaceutical concern raised dividends for the year to 18.63 pence from 6.14 pence.

Putting Inflation Hedges in Perspective

Study Challenges 9% Return on Stocks

NEW YORK, May 25 (AP-DJ)— A new study just published may go a long way to putting into perspective the perennial arguments over stocks and bonds as inflation hedges. Perhaps even more important, the data sbarply challenge the prevailing wisdom, based on other academic studies, that long-term returns on stocks have averaged 9

The latest study examines the behavior of stocks, bonds and inflation all the way back to 1910. Its findings are reported in the current issue of MSU Business Topics, a journal of the Graduate School of Business Administration at Michigan State University.

Authors of the study are Ruberi

Soldofsky, professor of finance at the University of Iowa, and Dale Max, associate professor of finance at Governors State University in

Easily, the most surprising result of the study is the showing that from 1910 to 1976 the total nominal return on stocks or bonds, without adjustment for infletion, averaged less than 5 percent a year.

In real terms, after adjustment for inflacion, the authors found the average annual return on both kinds of securities was less than 2 percent. The average annual change in consumer prices — the inflation measure — was 3.1 percent over that span of years while the real return averaged only 1.6 percent for stocks and 1.2 percent for bonds.

The findings are in sharp contrast with those of Roger Ibbotson of the University of Chicago and Rex Sinquefield of American National Bank and Trust. Their study, published last year and widely accepted in the financial and academic communities, placed nominal average returns between 1926 and 1976 at 9.2 percent a year for stocks and 4.1 percent a year for corporate bonds. Their inflation average in those 50 years was 2.3 per-

cent a year.

The inclusion of the years back to 1910 in the Soldofsky-Max study obviously adds a new dimension to the analysis of long-term rates of return and suggests that calculations over a shorter period, even one of 50 years rather than 67, may have overstated investor experi-

There is another important difference in the methods used in the Soldofsky-Max study. While the Ibbotson-Sinquefield measurements were based on market indexes, such as Standard and Poor's 500 for stocks and other indexes for bonds, the Soldofsky-Max study measured investment results of actual bonds, preferr stocks and common stocks. The common stock component, example, consisted of the 100 stocks having the highest total market value at the start of each dec-

Tracking investment results in real terms is "extremely important" for comparing inflacionary and deflationary periods, Mr. Soldofsky says, and for dispelling the myths that sometimes arise about securities as inflation bedges.

May Now Offer Best Profit Opportunities.

Recent Developments Confirm U.S. Stock Market

A complete record of the Soldof-sky-Max data, divided into 14 risk classes, will be published in a coming issue of the Bulletin, a publication of the Center for the Study of Financial Institutions at New York University. Meanwhile, the authors have commented on the data in the MSU publication and here are some of their assessments, by dec-

•1910-1919: The worst decade nf all for real returns. Inflation averaged 9.1 percent a year. In real terms, bonds lost 5.69 percent a year, preferred stocks dropped 7.28 percent a year and common stocks lost 5.96 percent a year. The last four years of the decade experienced the greatest infletion, and real returns on each securities group dropped about 14.7 percent

a year, nn nverage, in those years.

•1920-29: "Once-in-a-lifetime" years, the researchers say. Consumer prices declined an average of 1.5 percent a year and annual real returns on bonds and preferreds averaged 9.83 percent and 7.45 percent, the best average for these two groups over the study's 67 years. Even with the stock market crash of 1929, common stocks averaged a

real return of 10.05 percent a year. ●1930-39: For those who were not forced to liquidate fixed-in-come boldings, there were excellent real returns of 7.39 percent a year nn bonds and 3.85 percent on pre-ferred stocks. Common stocks lost an average 3.69 percent a year in real terms as consumer prices deflated at a 1.81 percent average an-

nual rate. •1940-49: War brought several years of high inflation. Over the decade, inflation averaged 6.8 percent a year and real returns averaged only 0.69 percent on common stocks and 0.17 percent on preferreds and real bond returns dropped 2.45 percent a year, •1950-59: Outstanding for

stocks, which averaged real returns of 12,45 percent a year while bond

returns fell 1.35 percent a year. In-flation ran at 2.35 percent a year. ●1960-69: Real stocks returns averaged 2.54 percent a year while

three years but averaged nnly 2.53 percent over the decade. ●1970-76: Stocks completely failed as an inflation hedge in the high-inflation years of 1973-75. Over the entire period, bonds were

bonds dropped 0.78 percent a year.

Inflation accelerated in the last

Bank System In Good Shape, Fed Chief Says

WASHINGTON, May 25 (Reuters)—The U.S. banking system is in good conditinn although problems remain, Feder-al Reserve Board Chairman Williant Miller told the Senate Banking Committee today. The continued expansion of the economy and a more conserva-tive approach to lending capital and liquidity by bankers has led

tn a healthier banking system, "Duning last year's testimony, Chairman (Arthur) Burns stated that the condition of the banking system had improved during 1976," Mr. Miller said in his prepared testimony. By most traditional measures this improvement continued during 1977 and into early 1978, Moreover, in the Board's judgement. the banking system today is in

good condition," he said.

Mr. Miller added, though, there are still a large number of problem banks by historical standards and the volume of troubled loans in bank portfolios is still uncomfortably

Big Board Prices Lower NEW YORK, May 25 AB said it now holds about 38 per-

Stock Exchange closed lower for the third consecutive session but trading activity eased. Aanalysts said investors are no

longer willing to lonk beyond the near-term problems to a less inflationary period later. Investors also fear a further tightening in mone-tary policy by the Federal Reserve-After the close, the Fed reported the nation's narrow M-1 money supply M-1 fell \$100 million in the reporting week while the broader M-2 rose \$1.5 billion.

The Dow Jones industrial average fell 2.51 to 835.41. Declining issues led advances by about 796-to-659. Volume slipped to 28.41 million shares from 31.45 million shares yesterday. Prices were mixed in active trad-

ing on the American Stock Exchange. The index edged up 0.04 to 143.97 but the average price per share lost one cent.

Dymo Eased 1/2 to 30%. Esselte

Output, Productivity

Revised in U.S. Data WASHINGTON, May 25 (AP-DJ)—Revised Labor Department figures show that productivity in the private business sector in the first quarter fell at a 2.9-percent seasonally adjusted annual rate while unit labor costs rose at an adjusted 17.8-percent elip.

The revised figures marked a

slight improvement over the initial estimates last month which put the adjusted rate of decline for productivity at 3.6 percent and the rate of increase for labor costs at 18.3 per-

FINANCIAL NEWS AND NOTES

Kennecott Copper Claims Victory

Kennecott Copper claims victory in its proxy fight with Curtiss-Wright but indicated that vote totals from the balloting at its May 2 annual meeting would not be released for two weeks. In a terse press release. Kennecott said it had been advised by Corporation Trust Co., the inspector of elections at the meeting that the preliminary count of votes "indi-cated that the management slate of directors had been re-elected." Spokesmen for both Kennecott and Curtiss-Wright, which owns 9.9 percent of Kennecott's shares, decline to reveal the preliminary figures. Kennecott described as "inaccurate" a statement by Curtiss-Wright saying that slate of directors 46.7 percent or or 11.07 million votes in the election.

Imperial Oil Unit Finds Uranium

4,070

3,610

Esso Minerals Canada, a unit of Imperial Oil Ltd., says core analyses on 43 diamond drillholes at Mid-west Lake Saskatchewan show uranium values in 35 holes over a strike length of about 3,100 feet. The drilling is being done through a joint venture of Esso Minerals Numac Oil and Gas and Bow Valley Industries Ltd. Imperial Oil is 70-percent-owned by Exxon. The results bave been divided into two categories. The average grade of the material closer to

the surface in 24 holes is about 2.2 pounds per 2,200 pounds with core thicknesses ranging from three to 90 feet. The average grade of deeper mineralization in 23 drill boles was 66 pounds per 2,200 pounds with a thickness of three to 84 feet. Some holes showed mineralization at both deeper and shallower levels. Drilling will resume this week.

Abu Dhabi Gas Project Set

Abu Dhabi and three foreign oil companies are about to sign a \$1.35-billion project to collect, process and export gas gathered from the emirate's onsbore oilfields, sources at the state-owned Abu Dhabi National Oil Co. say. Adnoc will have a 68-base of the page concern with Powel percent share of the new concern with Royal Dutch/Shell group and the Compagnic Francaise des Petroles, each holding 15 percent, and Partex the remaining 2 percent.

IBM Gets First China Order

IBM World Trade Americas-Far East Corp., a unit of International Business Machines, says it has received an order for a medium-size series 370 computer system from China for use in a turbo-fan manufacturing plant in northeast China—the first com-firmed computer order from China for the concern.

The small increase in sales reflects the world business trend in 1977: overall stagnation after a temporary recovery at the beginning of the year, large over-capacities in chemical plants world-wide and severe competition in the E.E.C. due to imports from third countries, notably from Eastern countries.

Moreover, the appreciation of the Belgion franc versus the currencies of most of the countries where we carry on our activities practically offset the slight improvements recorded in quantities sold and selling prices. The 6% rise results mainly from the inclusion of new subsidiaries in the Group, principally in Germany.

Consolidated net profit shows a significant drop compared with 1976—admittedly a record year.

2. CONTINUATION OF THE CAPITAL EXPENDI-TURE AND RESEARCH EFFORT, INCREASE IN THE NUMBER OF PERSONS EMPLOYED.

> STABILITY OF THE PARENT COMPANY NET PROFIT (SOLVAY & Cie SOCIETE ANONYME). DIVIDEND MAINTAINED.

> The net profit amounts to B.Fr, 2,064 million, up by 3.5% (B.Fr. 1,994 million in 1976).

The Board of Directors decided to propose to the General Meeting on June 12, 1978 to distribute o net dividend of B.Fr. 200 per fully paid share.

The table of the net dividends per fully paid share for the last five years would thus be as follows: 1973 1974 1975 1976 1977

170 185 170 200 The total gross dividend would thus again stand at B.Fr. 250 per fully paid share and 8,Fr. 100 per C

The proposed distribution of the available profit, including the balance brought forward from the previous year is as follows:

Net dividend of 8.Fr. 200 per A and 8 share .. 1,278,872,000 Net dividend of B.Fr. 80 per C share Withholding tax on dividend..... 110,887,200 347,439,800 Reserve not available for distribution (France). General reserve 300,000,000 B.Fr. 2,230,277,484

By the beginning of June, copies of the English version of the detailed brochure concerning the Group activities in 1977 will be obtainable, on request, from Solvay & Cie Societe Anonyme, Secretariot General, rue du Prince Albert, 33, 1050 Bruxelles (Belgium). **IMM Futures**

THE EIGHTH SIN

By Stefan Kanfer, Random House, 288 pp. \$8.95.

GETTING UP AND GOING HOME

By Robert Anderson, Simon & Shuster, 287 pp. \$9,95.

Reviewed by Christopher Lehmann Haupt

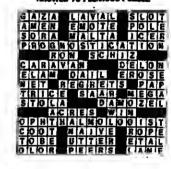

Is IT possible for a conventional novel to do justice to the Holocaust? Stefan Kanfer—television and film writer. Time magazine book-review editor and author of "The Journal of the Plague Years." about the witch hunts of the 1950s-has certainly made an honest effort in his first novel, "The Eighth Sin." about a Gypsy boy named Benoit who grows up haunted into terminal despair by the memory of his death-camp experiences. The story's epistolary text. addressed by Ben 10 his foster child. Daniel is studded with ex-cerpts from Nazi-geoocide literature, which serves to lend Ben's odyssey a horrifying documentary patina.

As Ben makes his way first to England, then to America, he experiences sufficient psychological tor-ture to be cataloged under the headings of the seven deadly sins, Avarice, Pride, Gluntony, Sloth, Lust, Envy and Wrath, each of which serves as the heading of a chapter in which Ben explores a particular aspect of his attempt to accommodate himself to the past. As Ben muses, ever the sardonic wisecracker: "Maybe history was the nightmare from which we were trying to waken, but for me night-mares were the history from which I was trying to awaken.

And lest Ben's autobiography seem too self-absorbed and claustrophobic. Kanfer has seeded "The Eighth Sin" with lively, sharply observed characters who are engaged in different attempts from Ben's to blend their alien pasts into the American melting pot-Max Kaufman. Ben's adoptive father, an un-reconstructed Marxist who loses his teaching joh for taking the Fifth Amendment at a congressional investigation: Mordecal, a delightful sententious old carpenter. "a deciduous Jew, shedding pruverbs": Otis Hall, or Hall the Tall, a black juvenile delinquent who parlays his disadvantages into hyperkinetic TV stardon; and Inger. The manic-depressive folks-inger in desperate flight from her yokel hackground, who "in the full-ness of catastrophe" becomes Ben's

wife for a time.
Altogether, "The Eighth Sin" is n pyrotechnic performance mordantly witty, fierce in its determination to look hell in the mouth and full of harrowing passages. But what really drives the narrative forward is Ben's intermittent search for a of Ben's concentration camp in exterminating fellow Gypsies. So when the dust finally settles and the hodies are counted and Ben has returned to living a Gypsy's life in

AUSTRER TO PREVIOUS PUZZLE

the old cities and the death-camp museums of Europe, "The Eighth Sin" remains a mystery-thriller sparked by the motive of revenge.

And for all its passion and despair and desermination to bear

witness to the Naza extermination of the Copsies, the novel cannot do pistice to the reality. For even to hint that revenge is possible seems to play down the enormity of the Nazi genecide. And to deal with the enormity in a conventionally entertaining form, complete with a tricky ending, is somehow to trivialize it all the more. Despite the eruelly witty observation made about ABC-TV's recent extravaganza, that "There's no business like Shoah business like Shoah business" ("Shoah" heing the Hebrew word for "a ca-tastrophe that leaves behind it a blighted landscape"), Kanfer's novleaves an inappropriately unpleasant aftertaste. In short, I wish I could respect the whole as much as I admired the parts.

In "Getting Up and Going Home," his second novel, play, wright Robert Anderson ["Tea and Symphony": "I Never Sang for My Father" I has tried to capture a catastrophe of an altogether different order—the case of a woman who after many years of marriage de-cides she doesn't want to live with her husband anymore and the elfeet of her decision on the husband, who cannot comprehend its reality. Telling this increasingly familiar tate from the point of view of the husband, Jack Montgomery, Anderson manages fairly effectively to dramatize Jack's gradual awaken-ing-his cold sweats in the small hours of the morning, his desperate casting about for other women, his confusion of his own wants with his wife's and his eventual stricken re-

alization that the fig is really up. But what a mess of cotton-candy prose we must devour to get to the nuh of the matter. Here is why Jack doesn't want Kim, his lover, to leave her husband; "They were in many ways the perfect modern cou-. ple, young, ambitious, cool, making if in every department"-which, putting aside its syntactical infelicity, tells us just about nothing, "All his life [Jack] had tried to avoid liv-ing the cliches," Anderson assures

Yet the first time he kissed the woman he would marry, "She stopped and looked at him, surprised, touched, aimised," and the first time he makes love to Rim, Gypsy named Eleazor Jassy, who, they look at each other and smile we learn from snatches of dialogue and shake their heads "in delight that drift hack to Ben from the and wonder." At various times, past, collaborated with the masters of Ben's concentration camp in exdesirable," and "infinitely dear again. A room is "totally different" while a woman wants to be "tutally independent." People "genile each other" even when they are feeling tension "within" theniselves. Rela-tionships are "needful" and "meaningful" and, of course, "caring," In the long run, Jack, seeing that he is losing his wife, "feels a terrible sense of loss."

Enough, Perhaps the trouble is that Anderson, practiced as he is all provided and the sense of loss."

writing dialogue, is simply not yet accustomed to rendering descrip-tive prose. The wonder is that his characters, as wrapped in cliches as they are, succeed in touching the reader as much as they do.

Christopher Lehmann-Haupt is a book reviewer for The New York

BRIDGE

By Alan Truscott

On the diagram South opened and led a third round of clubs, ruffed by declarer. The diamond agame on the pext round after West had made a take-out double and ruffed. South's remaining diagram North had raised spades. The open-ing lead was a club, won with the ace. The beart king was led and taken by the ace.

A heart was returned to dummy's jack, and South entered his hand with a club lead and led a low diamond. West put up the king

Rangers Ready To Seek Flyers' Shero to Be Coach

By Gerald Eskenazi

disclosed yesterday that he would talk to the Philadelphia Flyers about releasing Fred Shero to become the New York hockey team

Werblin admitted that he had spoken "just once" with Shero's agent, Mark Stewart of Philadel-phia to learn whether Shero was

"But I can't do it again. It's tampering," said Werblin:
Shero resigned as the Flyers' coach last Monday, with a year to go on his contract. In his seven seasons as their leader, the Flyers won two Stanley Cups and were the only team to reach the National Hockey League playoff semifinals each of the last six seasons.

Cash Demand Likely

"I guess I'll call Snider to discuss Shero," said Werblin, Ed Snider is the Flyers' president. If he were to release Shero from his contract, he presumably would demand com-pensation from the Rangers, who play in the same division. But Stewart said by telephone from Philadelphia that "positively, Fred Shero is not interested in coaching any more, anywhere. A general manainto consideration.

Shero was not available for com-... ment, Snider also was unavailable. ha But Stewart and Werhlin denied that they had met last weekend, as virtually everyone in Philadelphia

Werblin, chairman of the Madi-Square Garden Corp., was at the Preakness in Baltimore, then wen't to Arlington Park in Chicago. Stewart was with his wife, who was

ill in the hospital. Of Shero's contract, Stewart said,

ST. LOUIS, May 25 (UPI)—The Cardinals' 2-0 victory last night over the Montreal Expos snapped give Pitsburgh a victory over New Pathon 2 P give Pittsburgh a victory over New York. Willie Montanez hit a pair of homers for the Mets.

Giants 2, Astros 0

San Francisco, Vic Harris drove in all the runs with a hloop single to center and John Montefusco and Gary Lavelle combined on a five-hit shutout as San Francisco hlanked Houston.

Cubs 6, Phillies 4

At Chicago, Manny Trillo's two-run homer with two out in the 10th gave Chicago a victory over Phila-delphia and extended its winning streak to four games while boosting them into first place in the NL

At Cincinnati, Mickey Mahler's hases-loaded walk to Joe Morgan Pirates 6, Mets 5 forced home the winning run and capped a three-run eighth inning

NEW YORK, May 25 (NYT) — His contract with the Flyers is only for coaching. So he would he free to take a GM's job. Right now, he's not in a frame of mind to talk to the Philadelphia Flyers

There has always been an air of mystery around Shero, who is 52. When he hired Stewart four years ago, he was believed to be the first coach in NHL history to have an

During one playoff series, Shero was found beaten up outside a har under circumstances he never explained. But his players didn't seem surprised. Their nickname for him was "Fog." which they claimed he was in at times. It was not a derogatory term, though. He often seemed to be thinking of something completely apart from the situation at hand.

Padres 9, Dodgers 3

At San Diego, reliever John D'Acquisto pitched four scoreless innings and Tucker Ashford drove in three runs to carry San Diego over Los Angeles. Gaylord Perry, 3-1, was credited with the triumph while Rick Rhoden, 4-3, took the

Red Sox 8, Blue Jays 2

At Toronto, Jack Brohamer's two-run homer in the second inning gave Boston the push to a victory over the Blue Jays and lifted his recrod to 6 RBIs in 14 games. Mike Torrez, 6-2, took the victory.

Orioles 1-1, Tigers 5-0

At Baltimore, Jim Palmer fired a six-hitter for his 47th career shutout which earned the Orinles a split with Detroit. Palmer, 5-4, was sup-ported by Andres Mora's homer in the seventh inning. Auerio Rodri-guez singled home Milt May with the winning run in the ninth inning

Angels 4, White Sox 1

At Anaheim, Calif., Don Baytor and Bobby Grich hit home runs and Chris Knapp pitched a four-hitter for his sixth victory as California moved into first place in the AL West by .005 percentage points over Oakland. Knapp, 6-3, struck out two and walked one.

Brewers 7, A's 1

At Oakland, the fading A's dropped their second in a row under new manager Jack McKeon and 12th in their last 17. Sixto Lezcano and Robin Yount drove in two runs each for Milwaukee while Mike Caldwell pitched his fourth complete game, a six-hitter.

Rangers 3, Twins 2

At Bloomington, Minn., Al Oliver's second RBI-single of the game scored pinch runner Bohby Thompson with the winning run af-

Atlanta shortstop Darrel Chaney jumps over Cincinnati's Dave Collins, who is forced out at second by Joe Morgan's hit to Chaney. Chaney is too slow in throw to first for a double play.

Billy Martin: the Brief and Secret Manager of the Oakland A's

By Dave Anderson NEW YORK, May 25 (NYT) — Insurance is his real business, but Charles Finlcy would never write a policy on the dugout expectancy of policy on the dugout expectancy of his Oakland A's managers. Impetuous and impatient, he has discharged many, traded Cbuck Tanner to the Pittsburgh Pirates and went to court to prevent Dick Williams from joining the New York Yankees in 1973 after the second of the A's three consecutive with a 3-0 won-lost record, to the Toronto Blue Jays for only \$10,000. Another is that Finley planned "to put earphones on my manager, like tootball coaches have," the better to advise him on lineups and strate-ond of the A's three consecutive when Finley som Joe Coleman, an unsigned relief pitcher with a 3-0 won-lost record, to the Toronto Blue Jays for only \$10,000.

contender in the American League West, the manager has discharged

"wasn't comfortable;" all the other A's managers have known the feel-

One theory is that Winkles was annoyed when Finley sold Joe Coleman, an unsigned relief pitcher York Yankees in 1973 and the solution ond of the A's three consecutive gy. Whatever the last straw was, Winkles took a walk in order to be with a grain.

In his clubhouse office as the the owner. Bohby Winkles has New York Yankees manager, Billy resigned, only to be succeeded by Martin had to chuckle. He once Jack McKeon, who had been such had been the A's manager nobody ceeded by Winkles early last sea-son. Winkles told Finley that he his hiring was announced.

"That was during the 1970 season when I was out of baseball," said Martin, who had been dismissed as the Minnesota Twins' manager after losing to the Baltimore Orioles in the 1969 American League playoffs. "I was working as a personnel man for a string of ra-dio stations that a guy in Minneso-ta named Vic Armstrong owned. That's when I found out other people lived a different life - at 5 o'clock you went to cocktails instead of to the ballpark.

But the ballpark was in Martin's blood, as it always was, as it always

"The A's were going had," he remembered. "Charlie phoned me and I went down to Chicago and we talked five or six hours in his office. He told me I had the joh and I was going to fly in to take over. John MeNamara was the A's manager then and I even told Charlie that even though he was firing John, I wanted him as my third hase coach and Charlie agreed.

Calls Unanswered

me, 'My secretary always knows where I am.' So I kept calling his secretary but be still never called As it developed, John MeNamara finished the season but

then Finley hired Dick Williams. "I sent in my resignation before I was even hired." Martin recalled with a laugh. "But finally Charlic called me back and said 'What's the matter, Billy? But it was all over by

He also had been talking to the Detroit Tigers so when the A's job fell apart, he pursued the Tigers job. The next season he was the Tigers' manager and in 1972 he was in another losing playoff, this time with the A's, who were in their span of five consecutive Western Division titles. Martin later moved to the Texas Rangers and then to the Yankees during the 1975 season but if he had taken command of the A's, his career since then might have been different. Instead of going to the ballpark now as the

Not that Martin came up empty.

The Soccer Scene

England's Victories Demand Perspective

by Rob Hughes

LONDON, May 25 (IHT) — This morning, exactly one week be-fore the start of the World Cup in Argentina, Britons tuned into the BBC or opened newspapers to discover just how wild and how unreliable the perspective of international soccer can become.

Because England last night de-feated Hungary, 4-I, and because it also beat Scotland, 1-0, in Glascow last Saturday, everyone is suddenly convinced that "we are the masters now." that it is "tragedy" that England is not going to Argentina. This, of course is based on the two victories over sides who have explicit. This, of course is based on the two victories over sides who have qualified for the World Cup: in the case of Hungary, it is a nostalgie revenge for the 6-3 and 7-1 hammerings the magical Magyars handed England 25 years ago.

But true victories? True revenge? In Gluseow last Saturday, England's was a victory for sheer tenacity, for the will power of a

tenacity, for the will power of a side hanging on defensively for all it was worth, for the most part, and breaking out to score a late winner when the Scottish keeper, Alan Rough, characteristically fumbled a

Better Form

Last might was very much more impressive: a rampaging, flowing English performance which appeared in outclass the Hungarians at Wembley. In the first 37 minutes, England scored three goals, through winger Peter Barnes, defender Phil Neal (a penalty) and forward Trevor Francis.

Significantly. Lajos Baroti, the wise old Hungarian manager, said afterwards: "Not for a long time have I seen England play so effectively." He added, "We conceded those three goals with hardly a defender in our half." Now you can believe one of three

explanations for that: That English soccer is sudden-

ly so devastingly superior it leaves Hungary behind. • That Hungary is a poor soccer

nation, which its qualifying victories over the Soviet Union defy. That Hungary came, as they surely did, en route to more import-ant games, that at least half of the Hungarian minds had flown ahead

of them to the World Cup finals. The truest perspective of what has been happening when England played World Cup teams this week is that the opposition is reserving its best for someone else: That some players are afraid to put heart and soul into it, afraid understand-

When, in the second half, England's pace withered and Hungarian pride rose off the floor, we

most important games of their

garian technicians: the midfield general Tibor Nyilasi and the tricky general Tibor Nyilasi and the tricky center-forward Andras Torocsik giving strong hints of their true class. They combined brilliantly to provide for Laszlo Nagy a consolation goal, although England brought on a substitute, Tony Currie, who promptly scored a fourth goal with a fiercely struck 25-yard shot that goalkeeper Sandor Gujdar could not hold.

And away they flew; England to

And away they flew: England to the ecstasy of a nation desperate for victories of any kind, Hungary in their real purpose in Argentina.

th their real purpose in Argentina.

The perspective was put about right by England manager Ron Greenwood, who, though he welcomed the applause and the obvious rewards his team-huilding has achieved since the ill-fated Don Revie abdicated last year, said at the end of the night: "It's a pleasure to be involved... but I never get carried away in soccer. It is a game of tomorrows, not yesterdays." tomorrows, not yesterdays.

Thus none of us who prepare for the World Cup should allow recent form, the immediate yesterdays, delude our judgment: there are teams like West Germany and Italy, Bra-zil and even Peru, whose recent form cannot he taken as a yardstick to that which they will expect next

By then, the experimentation, the holding back, the problems of mo-tivation and determination should all be history: by then, they must play to the height of their form, or risk elimination at the hands of the so-called underdog nations. I doubt there will be too much of that.

Injury Scratches

Seattle Slew

NEW YORK, May 25 (UPI) Seattle Slew, last year's winner of the Triple Crown, who raced for the first time in 10 months May 14 and won easily, is reported to have a slight filling in his right hind ankle that prompted the colt's owners to cancel their immediate plans for racing him and start a new sched-

"We just don't want to take a chance," said Jim Hill, who with his wife Sally and Karen and Mick ey Taylor recently sold a half-inter-est in Slew for \$6 millinn. "It's a minimal type injury, and we really aren't sure where he got it although we first naticed it two ar three days after be raced." ably to risk limbs so close to the

Italian Open Quarterfinals

Newberry Advances in Women's Singles

ROME, May 25 (UPI) - Janet Newberry of the United States upset top-seeded Mima Jausovec of Yugoslavia 3-6, 6-2, 7-5 today in the women's singles quarterfinals of the Italian Open Tennis Cham-

pionships.

Newberry, 24, who won the women's singles title in Italy last year, kept the pace of the match slow and allowed the Yugoslav to make the errors.

Jausovec, 21, took the first set easily with her fast serve and pow-erful returns but fell in the second when Newberry began a tedious psychological attack by lobbying repeatedly to the baseline to make up for her lack of a strong fore-The upset of Jausovec, ranked

15th among the world's women players, put Newberry into the semifinals against Regina Marsikova, the No. 3 seed from Czechoslo-vakia. Marsikova advanced by downing Betsy Nagelsen of the United States 6-4, 6-2.

In other women's quarter final results, Michele Tyler of Britain defeated Katja Ebbinghaus of West Germany and Virginia Ruzici of Romania beat Renata Tomanova of Carabellouskie of Czechoslovakia In the second round men's singles yesterday, Bjorn Borg of Sweden defeated France's Eric De-

blicker 5-7, 6-2, 6-0 to go against ninth-seeded Roscoe Tanner of the United States in third round play. Tanner, 26, made it by prevailing against Jiri Granat of Czechoslova-

Other pairings that promise good tennis feature fourth-seeded Eddie Dibbs of Miami, Florida against Australia's Kim Warwick, and American veteran Arthur Ashe against fourth-seeded Harold Solo-

mon of Washington D.C. Third-seeded Brian Gottfried was expected to have a relatively sure match against unseeded Jose Detroit Higueras of Spain.

But the first two days' play showed that seedings and world rankings are not always reliable.

Second-seeded Vitas Gerulaitis second Game of was eliminated on the first goround as were Raul Ramirez of

Somebody had stepped on five of mine in a crowded place, and it occurred to me that for city people ribs, where nobody would have to toes were a mistake. In fact, major parts of the human design are a mistake for city living. Things that must have seemed

sensible when the architect was designing anatomy meant to live in a garden wearing nothing but its own peli seem like hopeless blunders in an organism com-

pelled to dwell among hordes. Baker drink gin and worry ahout who's gaining on it from behind. I do not fault the creone have guessed that man would

ingion Avenue subway? Yet it is time to rethink the design from toes to skull, for gardendesign man is no more fit for modern urban living than a Spad is to go up against an intercontinental ballishe missile.

prefer to quit contemplating lilies and peacocks for life on the Lex-

The skull might be a good place to start. At present, it houses nothing but a clump of absurd hair, and sometimes not very much of that. For man in a garden, hair might be a reasonable appurtenance; it gives him something to twine dandehon chains in during spring evenings. In the city, however, its chief function is to release dandruff, which makes males loathsome to the women they desire and exposes from to the humiliation of lectures from their husbands on correct tonsorial sani-

Besides being a troublemaker, hair occupies the one place on the body that is most easily shampooed. And what does urban man need shamprood most urgently? His lungs. Everyone who lives in a city ought to wash his lungs at least twice a week. The sensible place to locate lungs is on the surface of the head, a location now occupied by the idle and mischievous hair.

Afflicted with the anatomy of Garden Man, we now have the lungs locked inside a prison of ribs: as a result, we can avoid their be-

Urban Relocation NEW YORK—City life started quire only a simple transfer of body me thinking about toes, parts. The lungs would go to the ebody had stepped on five of present location of the hair, while the hair would be sealed inside the

Observer

see what it was up to. This might even make it possible for tebaceo addiess to smoke again without terror, since it is entirely possible that smoking may destroy dandruff.

Whether all the toes could be disposed of. I am reluctant to guess. True, their most palpable function in city life is to be stepped on by other peoples' feet, but some such vulnerable protuberance may be necessary, for reasons known only to anatomists. In any case, there is surely no reason to have 10 toes to do the job. The creating architect was remarkably generous in pass-ing out the toes. When we consider that he thought two kidneys, two ating architect for miscalculating eyes and two ears were enough to the destiny of man. How could any handle far more interesting work than the toes are called upon to perform, it seems possible that he was simply padding out the con-struction with leftover materials.

My guess is that one or two toes per foot would be more than adequate to do whatever toes are sup-posed to do. It would certainly reduce the number of toes vulnerable to assault in crowded intersections.

For Urban Man, one liver is not enough, especially since the liver. being made of notoriously inferior material is subject to frequent breakdown. Instead of 10 toes, he needs two livers. Or better yet, no liver at all, but another kind of alcohol-processing system which can be easily worked on in case of factory recalls,

A sensible solution here would be to use the ears. Originally designed to keep dandelion chains from slipping down around the neck, they have lost all purpose in a society that strangles itself with neckties, bandannas and chains of mineral, and they are, moreover, marvelously accessible for repair and replacement if ravaged by sour

niash Esthetes may protest that a man with lungs on his head and livers behind his cheekbones makes a disagreeable spectacle. Considering the variety of styles that New York man affects in public, however, I believe we can safely conclude that foulment only by not breathing. A reasonable design change would resignify amiss.

The Obsessive Passion Of Bicycle Collecting

by Gary Yerkey

NIJMEGEN, the Netherlands (IHT)—When Gert Jan Moed visits the United states for the first time later this year, he will cast only a fleeting glance at the Statue of Liberty and the Empire State Building. His sights will be set on distant horizons, namely, something called the "bone shaker," a late-19th-century bicyle with wooden wheels and iron tires. If he finds one, he will do what he normally does with hieyeles-buy it-and when he does, it will become the first American-built machine in what he believes is the second-largest private hicycle collection in the world.

Since 1967, when he was in England with his parents and saw an old bicycle in an antique shop, he has suffered an obsession with bicycles that has since led hint to accumulate more than 150, from a French "hohhyhorse" (1820) to a Dutch Molten (1970). The collection forms a history of man's most efficient mode of transport. His mother values other things. Recently, she told her son to remove the growing collec-tion from the family home here, so three months ago, Mr. Moed bought an old warehouse nearby and decided to turn it into a bicycle museum. "What else could I do?" he asks.

Mr. Moed. 25. who works in his father's construction business, travels widely. Wherever he is he peers into garages and other likely places looking for old bicycles, some all but rusted away. "I need only about 60 more bicycles," he says, "to complete my European collec-tion." So far, he has restored to their original state the same number in his present collection; he hopes to finish the rest within the next two years. Meanwhile, he may even keep ahead of new acquisitions, he says, adding that his current rate of purchase is about 10 per year.

A Dream

"For 10 years. I had a dream," he reflects, "and last year it eame true. I had wanted a Lallement. Without it, my collection would have been lacking." He found the Lallement-the most famous French bone shaker, built in the 1860s-in an antique shop near Tours, France.

The Lallement takes its name from its designer. Pierre Lallement, a disgruntled engineer employed by France's foremost bicycle manufacturers, Pierre and Ernest Michaux, who emigrated to the United States in 1866 and, with James Carrol of Ansonia, Conn., took out America's first bicycle patent-but not before he had built several of his own designs in France, one of which Mr. Moed now owns. It was the first hicycle to have pedal cranks on the hub of the front wbeel.

Twenty-seven years earlier, in 1839, the first ridable bicycle—i.e., one that could be propelled without pushing it with the feet on the ground-was built. Kirkpatriek Macmillan, a Scotsman, produced a hicycle with the rear wheel larger than the front wheel that employed reciprocating pedal cranks at the from connected to the rear hub by steel rods. Earlier bicycles, iocluding the first steerable model (by Michael Kessler. 1760) and those made by Dennis Johnson of London laround 1820) for the Regency dandies [thus, "dandyhorse" and "hobbyhorse"), were propelled by pushing the feet along the ground-Similar machines appear far back in history, even on bas-reliefs from ancient Bahylon and Egypt and on frescoes from Pompeii.

After self-propulsion, the next advance in bicycle design—or more correctly, retrogression—came in 1861 when Pierre Michaux, with the assistance of Lallement, built a model with rotating pedal cranks linked to the front hub. By 1865, the Micbaux brothers were producing 400 such machines per year; his success prompted other companies to join the act. One of then, Tribout and Meyer, is reputed to bave invented chain drive [1869]. But Mr. Moed says they only manufactured the first working model: It was the inventor of the armored car and the alarm clock. Leonardo da Vinci, who in fact first proposed moving a bicycle by an endless chain. "His contribution was proved in the mid-1960s," says Mr. Moed, "when researchers discovered additional mechanical notes Leonardo had done, now called the Madrid Codices."

Gert Jan Moed with 1871 British Ariel.

At the time Michaux's business went into full swing, the Franco-German war broke out, forcing him to find markets elsewhere, notably in England where the new machines had begun to become accepted.

But it was an Englishman, James Starley, often called "the father of the bicycle industry," who beat Michaux to the punch. In 1871, at 67, he put his inventive mind to work and designed and produced the Ariel (commonly known as the "ordinary" or "penny-farthing"), a high-riding machine with the from wheel much larger than the rear. Its novel feature was a gear that allowed the front wheel to revolve at twice the speed of the pedal cranks. Starley's Ariel established the

shape of breycles for the next 10 years. In 1874, replying to the Ariel's reputation for frequent and serious falls, H. J. Lawson, an Englishman, brought out the "safety" hicycle. which, with its two medium-sized wheels of equal diameter and the rear wheel driven by chain from pedal cranks in the middle, is nearly idenucal to today's design. John K. Starley, a nephew of the original Starley, was the first to mass produce the "safety" (called the Rover). and in four years it dominated the market. In another few years, no more Ariels were being manufactured. And by 1893, the design of the bicycle had been stabilized, with the modern diamond frame with roller-chain drive and pneumatic tires (invented by John Boyd Dunlop, another Englishman) the central features.

Special Models

Gert Jan Moed can claim to have examples of every sort of hicycle designed and built since the early 19th century. But he sounds troubled, "It's not only the American hicycles that I need to find," he says. The Americans, after all, weren't critical in the history of the bicycle. It's the unusual machines, the special models, especially those that may have influenced automobile design such as the English machine built in 1885, that had seven wheels and carried four riders." He does own, however, a tricycle built in the late 1800s specially for women. It runs by pumping handles with the arms. "Apparently, it was thought too dangerous for a woman to ride a bicycle, and not proper for her to use her legs.

When Mr. Moed opens his museum with more than 200 different models (fewer than what he believes is the world's largest private collection, in England, but more than twice as large as the largest collection in the United States), he will not ride to the opening cerentonies on a hicycle. "You see." he says, embarrassed. "I don't have a hicycle of my own. I never have."

Mitchell Ordered Back PEOPLE: To Alabama Prison

After five months of freedom during which he underwent medical treatment. Juhn Mitchell, the fornier attorney general, has been ordered to return to a federal prison in Alabama to continue serving his term for his role in the Watergate cover-up. The 64-year-old Mitchell underwent surgery in Washington to repair a weakened artery in his abdomen, and in New York he had hip surgery. His five months of medical furlough from the minimuni-security prison at Maxwell Air Force Base will count as time served in prison, and Mitchell will be eligible for parole June 21, a year after he began lus one-to-fouryear term. One of his co-conspirators, John Ehrlichman, was released from a federal prison April 27 after serving 18 months. The other, H.R. Haldeman, will be eligible for parole from a prison in California nn June 20.

John Mitchell ...hack to jail

Nostalgia buffs across the United States will have a chance to see three of the most popular women singers of the hig-hand era of more than a quarter century ago together on the same stage. They've formed a nightclub act, now playing in New Orleans, called "Four Girls Four, consisting of Rosemary Clooney, Helen O'Connell, Margaret Whiting, and the comedienne. Rose Marie. Miss Clooney and O'Connell celebrated their hirthdays this week, saying they were both born May 23 but declining to specify which year.

Who's the most popular man in the United States! According to Andrew Young, the U.S. delegate to the United Nations, the answer isn't his boss. President Carter, but rather President Anwar Sadat of Egypt. Middle East magazine, published in London, quoted Young as saying. "The Americans were so taken with the sincerity and courage of [Mr. Sadat's] peace initiative that he almost singlehandedly bal-anced what had been an irrevocable 30-year commitment to Israel which did not consider what the Arab world wanted." He added that Sadat was "the most popular man in the United States, bar none, including President Carter, unfortunately.

Ever since he suffered a heart attack in 1976, there has been specu-lation that Justice Thurgood Mar-

shall might retire in July on his full \$72,000 salary and thus make a Su-preme Court appointment available President Carter, But now, Mar shall, in a speech at the University of Virginia, has made it clear that he expects to remain on the coun "for many years to come." Man shall, who turns 70 on July 2, said he had made a deal with his wife.
"When I'm starting to get sende,
she's going to tell me. Then I'll
retire." The court's first and only
hlack member, Justice Marshall who had served as solicitor general was appointed in 1967 by President

The oldest living recipient of the Medal of Honor, the highest U.S. military decoration, has celebrated his 101st hirthday. He is William Seach, a nursing-home patient at the Veterans Administration Hospital in Brockton, Mass. Seach a career Navy man, was given the Medal of Honor by Congress for valorous service in China, during the Boxer Rebellion 78 years ago. The official citation was for action with the relief expedition of the Allied forces in China during the battles of 13, 20, 21, 22 June 1900." Seach, who was at the time a seaman aboard the USS Newark, also served in the Spanish-American War and World War I, He was described by a hospital spokesman as "a little hard of hearing, but men-
